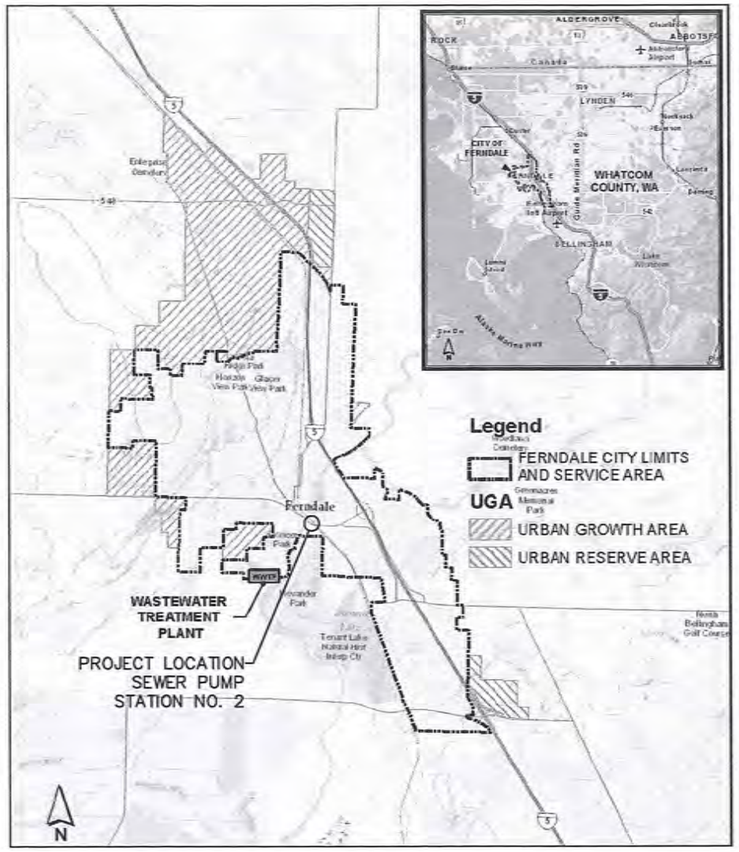
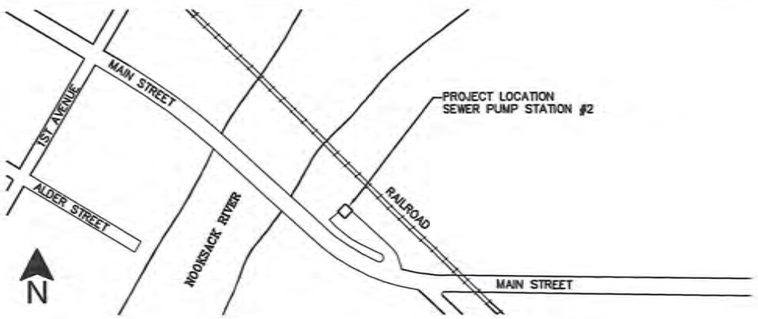
CITY OF FERNDALE, WA

PUMP STATION NO.2 UPGRADE – CITY PROJECT No. SS2014-02

VICINITY MAP - NOT TO SCALE



LOCATION MAP - NOT TO SCALE



GENERAL NOTES

1. ALL WORKMANSHIP AND MATERIALS SHALL BE IN ACCORDANCE WITH CITY OF FERNDALE STANDARDS AND THE MOST CURRENT COPY OF THE STATE OF WASHINGTON STANDARD SPECIFICATIONS FOR ROAD, BRIDGE AND MUNICIPAL CONSTRUCTION (WSDOT/APWA).
2. ALL APPROVALS AND PERMITS REQUIRED BY THE CITY OF FERNDALE SHALL BE OBTAINED PRIOR TO THE START OF CONSTRUCTION.
3. THE CONTRACTOR SHALL BE FULLY RESPONSIBLE FOR THE LOCATION AND PROTECTION OF ALL EXISTING UTILITIES. THE CONTRACTOR SHALL VERIFY ALL UTILITY LOCATIONS PRIOR TO CONSTRUCTION BY CALLING THE UNDERGROUND LOCATE LINE AT 1-800-332-2344 A MINIMUM OF 2 BUSINESS DAYS PRIOR TO ANY EXCAVATION.
4. ALL NEW PLASTIC PIPE AND SERVICES SHALL BE INSTALLED WITH CONTINUOUS TRACER TAPE INSTALLED 12" TO 18" UNDER THE PROPOSED FINISHED SUBGRADE. THE MARKER SHALL BE PLASTIC NON-BIODEGRADABLE, METAL CORE OR BACKING MARKED WATER WHICH CAN BE DETECTED BY A STANDARD METAL DETECTOR.
5. EROSION CONTROL MEASURES SHALL BE TAKEN BY THE CONTRACTOR DURING CONSTRUCTION TO PREVENT SILTATION TO EXISTING STORM DRAINAGE FACILITIES AND ROADWAYS.
6. IT SHALL BE THE RESPONSIBILITY OF THE CONTRACTOR TO HAVE A COPY OF THESE APPROVED PLANS ON CONSTRUCTION SITE AT ALL TIMES.
7. ANY CHANGES TO THE DESIGN SHALL FIRST BE REVIEWED AND APPROVED BY THE PROJECT ENGINEER.
8. ALL LINES SHALL BE CLEANED AND PRESSURE TESTED PRIOR TO PAVING IN CONFORMANCE WITH THE ABOVE REFERENCED SPECIFICATIONS. TESTING SHALL TAKE PLACE AFTER ALL UNDERGROUND UTILITIES ARE INSTALLED AND COMPACTION OF THE ROADWAY SUBGRADE IS COMPLETED.
9. PRIOR TO BACKFILL ALL MAINS AND APPURTENANCES SHALL BE INSPECTED AND APPROVED BY THE CITY OF FERNDALE CONSTRUCTION INSPECTOR. APPROVAL SHALL NOT RELIEVE THE CONTRACTOR FOR CORRECTION OF ANY DEFICIENCIES AND/OR FAILURES AS DETERMINED BY SUBSEQUENT TESTING AND INSPECTIONS. IT SHALL BE THE CONTRACTOR'S RESPONSIBILITY TO NOTIFY THE INSPECTOR FOR THE REQUIRED INSPECTIONS.
10. ALL WORK AND MATERIALS SHALL BE GUARANTEED BY THE CONTRACTOR FOR ONE YEAR AFTER FINAL ACCEPTANCE.
11. THE LOCATIONS OF ALL EXISTING UTILITIES SHOWN ON THE PLANS ARE APPROXIMATE AND NOT ALL ARE SHOWN. THE CONTRACTOR IS RESPONSIBLE TO VERIFY AND PROTECT ALL UTILITIES.
12. ALL RESTORATION AND LANDSCAPING WITHIN PUBLIC OR PRIVATE PROPERTY SHALL OCCUR WITHIN THREE WEEKS OF DISTURBANCE. THIS SHALL INCLUDE, BUT NOT BE LIMITED TO, ALL LAWNS, LANDSCAPING, FENCES, GRAVEL, ASPHALT AND CONCRETE.
13. THE CONTRACTOR SHALL KEEP A RECORD OF AS-BUILT INFORMATION THROUGHOUT THE ENTIRE PROJECT. THIS INFORMATION SHALL INCLUDE ALL DEVIATIONS FROM THE PLANS AND ANY OTHER PERTINENT INFORMATION NOT SHOWN ON THE PLANS BUT DISCOVERED DURING CONSTRUCTION.
14. THE CONTRACTOR SHALL REPLACE ALL MONUMENTS, RIGHT-OF-WAY MARKERS, PROPERTY STAKES, ETC. THAT ARE DISTURBED DURING CONSTRUCTION. THE CONTRACTOR SHALL USE A SURVEYOR REGISTERED IN THE STATE OF WASHINGTON TO COMPLETE ALL SURVEY WORK.

EROSION AND SEDIMENTATION CONTROL

1. IT IS THE CONTRACTOR'S RESPONSIBILITY TO PREVENT POLLUTION AND EROSION IN ACCORDANCE WITH WSDOT SECTION 1.07.15. EROSION CONTROL BEST MANAGEMENT PRACTICES SHALL CONFORM TO THE CURRENT WASHINGTON DEPARTMENT OF ECOLOGY STORMWATER MANAGEMENT MANUAL FOR THE PUGET SOUND BASIN.

EXISTING UTILITIES

1. CONTRACTOR IS ADVISED THAT UNDERGROUND WATER, SEWER, STORM, TELEPHONE, FIBER OPTIC, AND GAS MAY BE LOCATED IN THE VICINITY OF THIS PROJECT. NO ATTEMPT WAS MADE TO SHOW ALL UTILITIES ON THE PLAN. LOCATIONS SHOWN FOR EXISTING UTILITIES ARE APPROXIMATE. OTHER UTILITIES MAY EXIST WHICH ARE NOT SHOWN ON THE PLANS. PRIOR TO COMMENCING ANY UNDERGROUND WORK, THE CONTRACTOR SHALL POTHOLE ALL UTILITIES AT ALL PROPOSED CROSSING AND CONNECTION POINTS TO CONFIRM THEIR DEPTHS AND PLAN LOCATIONS.
2. IT SHALL BE THE RESPONSIBILITY OF THE CONTRACTOR TO DETERMINE THE TRUE AND CORRECT LOCATIONS OF EXISTING UTILITIES THAT MAY IMPACT THE WORK. CONTRACTOR SHALL NOTIFY ENGINEER PRIOR TO COMMENCING CONSTRUCTION IF MARKED UTILITIES APPEAR TO CONFLICT WITH PROPOSED IMPROVEMENTS. THE COST OF LOCATING, PROTECTING AND ACCOMMODATING EXISTING UTILITIES SHALL BE INCIDENTAL TO THE COST OF THE PROJECT. IF AN ACTUAL CONFLICT REQUIRES RELOCATION OF AN EXISTING UTILITY OR THE REDESIGN OF THE PROPOSED IMPROVEMENT, THE ENGINEER WILL DETERMINE IF EXTRA PAY IS WARRANTED TO ACCOMMODATE THE CHANGED OR UNFORESEEN CONDITION. MINOR HORIZONTAL OR VERTICAL ADJUSTMENTS OF THE PROPOSED IMPROVEMENTS TO AVOID CONFLICTS SHALL NOT ENTITLE THE CONTRACTOR TO EXTRA PAY.

TRAFFIC CONTROL

1. THE CONTRACTOR IS NOT ALLOWED TO COMPLETELY CLOSE ANY STREET TO TRAFFIC. THE CONTRACTOR SHALL MAINTAIN ONE OPEN LANE EACH WAY FOR THE DURATION OF THE PROJECT.

NO.	REVISIONS	BY	DATE

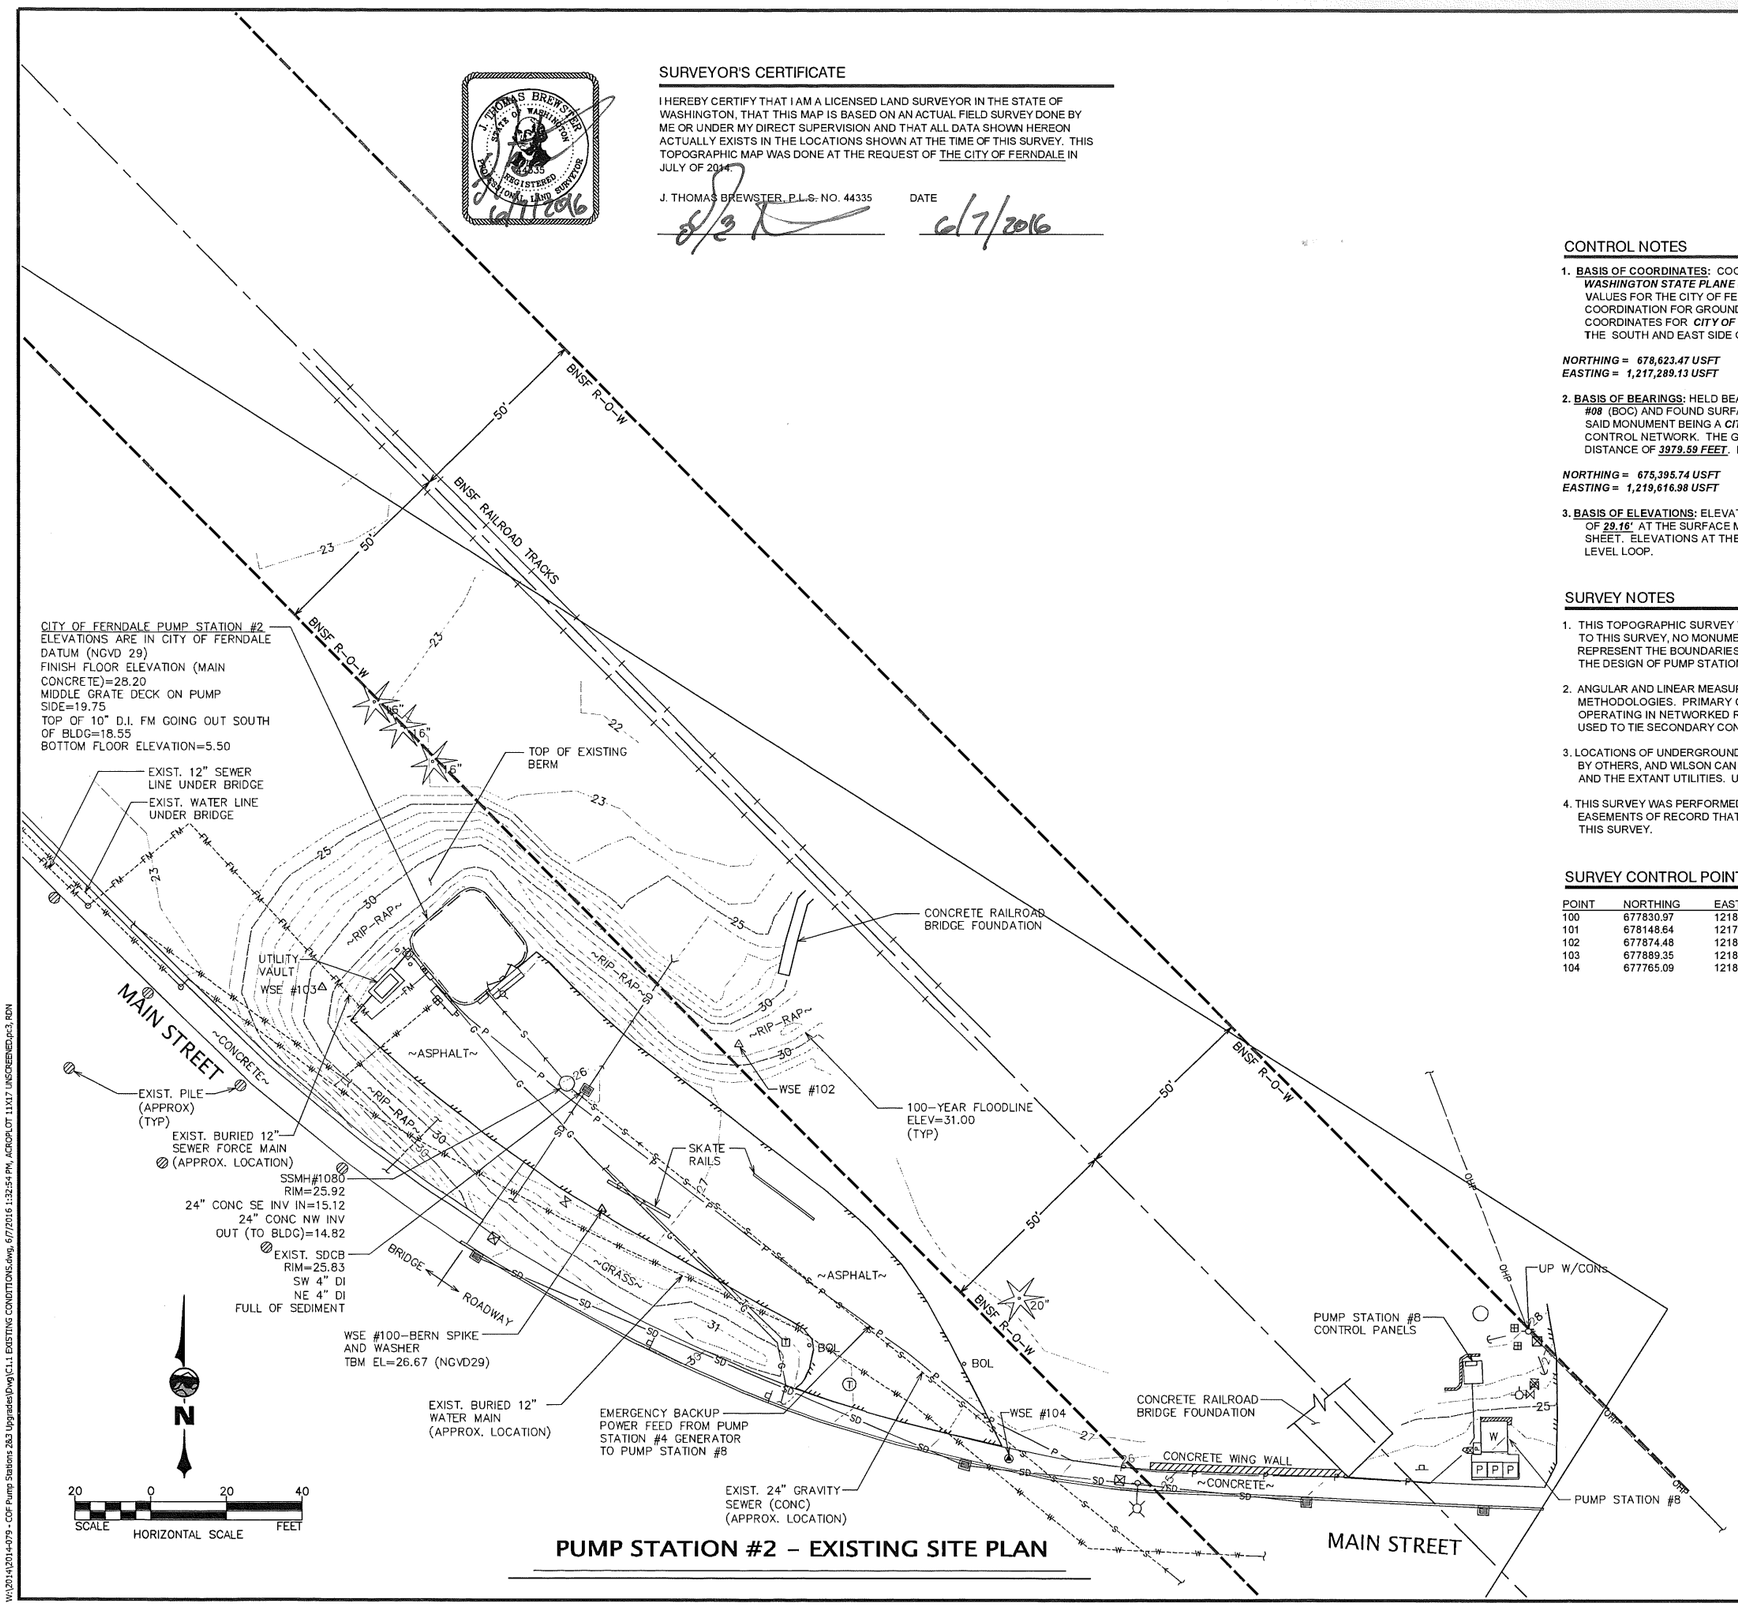
SURVEYOR'S CERTIFICATE

I HEREBY CERTIFY THAT I AM A LICENSED LAND SURVEYOR IN THE STATE OF WASHINGTON, THAT THIS MAP IS BASED ON AN ACTUAL FIELD SURVEY DONE BY ME OR UNDER MY DIRECT SUPERVISION AND THAT ALL DATA SHOWN HEREON ACTUALLY EXISTS IN THE LOCATIONS SHOWN AT THE TIME OF THIS SURVEY. THIS TOPOGRAPHIC MAP WAS DONE AT THE REQUEST OF THE CITY OF FERNDALE IN JULY OF 2014.

J. THOMAS BREWSTER, P.L.S. NO. 44335 DATE 6/7/2016



PUMP STATION #2 – EXISTING SITE PLAN

CONTROL NOTES

1. **BASIS OF COORDINATES:** COORDINATES ARE A GROUND-VALUE APPROXIMATION OF ***NAD83(2007) WASHINGTON STATE PLANE (NORTH ZONE) COORDINATES***, BASED UPON THE CONVERTED NAD83/91 VALUES FOR THE CITY OF FERNDALE'S 2001 HORIZONTAL AND VERTICAL CONTROL NETWORK. COORDINATION FOR GROUND-VALUE MENSURATION BASED UPON HOLDING THE FOLLOWING COORDINATES FOR ***CITY OF FERNDALE SURVEY MONUMENT #08***, A SURFACE MONUMENT IN CONCRETE AT THE SOUTH AND EAST SIDE OF THE SIDEWALK AT FERNDALE CITY COUNCIL CHAMBERS AS FOLLOWS:

NORTHING = 678,623.47 USFT
EASTING = 1,217,289.13 USFT

2. **BASIS OF BEARINGS:** HELD BEARING BETWEEN ABOVE MENTIONED ***CITY OF FERNDALE SURVEY MONUMENT #08*** (BOC) AND FOUND SURFACE MONUMENT IN CONCRETE AT CENTER OF CUL-DE-SAC OF SCOUT PLACE, SAID MONUMENT BEING A ***CITY OF FERNDALE CONTROL MONUMENT #11***, PER THE AFOREMENTIONED 2001 CONTROL NETWORK. THE GPS-DERIVED INVERSE BEARING BETWEEN #08 AND #11 BEING ***S 35° 47' 57" E*** A DISTANCE OF ***3979.59 FEET***. NAD83(2007) COORDINATES FOR #11 ARE AS FOLLOWS:

NORTHING = 675,395.74 USFT
EASTING = 1,219,616.98 USFT

3. **BASIS OF ELEVATIONS:** ELEVATIONS ARE ***NGVD29*** VALUES BASED UPON HOLDING THE PUBLISHED ELEVATION OF ***29.16'*** AT THE SURFACE MONUMENT DESIGNATED CITY OF ***FERNDALE #08***, PER THE PUBLISHED DATA SHEET. ELEVATIONS AT THE WILSON SITE CONTROL POINTS WERE ESTABLISHED BY CLOSED DIGITAL LEVEL LOOP.

SURVEY NOTES

1. THIS TOPOGRAPHIC SURVEY WAS PERFORMED IN JULY, 2014. ALTHOUGH THERE IS A BOUNDARY COMPONENT TO THIS SURVEY, NO MONUMENTS WERE SET DURING THE COURSE OF THIS SURVEY PURPORTING TO REPRESENT THE BOUNDARIES HEREON SHOWN. THIS TOPOGRAPHIC SURVEY WAS PREPARED TO SUPPORT THE DESIGN OF PUMP STATION UPGRADES.

2. ANGULAR AND LINEAR MEASUREMENTS WERE COLLECTED USING A COMBINATION OF GPS AND CONVENTIONAL METHODOLOGIES. PRIMARY CONTROL WAS COLLECTED USING TRIMBLE 5700 SURVEY-GRADE GPS RECEIVERS OPERATING IN NETWORKED RTK MODE. FROM GPS CONTROL, A TRIMBLE S-6 ROBOTIC TOTAL STATION WAS USED TO TIE SECONDARY CONTROL POINTS AND COLLECT TOPOGRAPHIC DATA.

3. LOCATIONS OF UNDERGROUND UTILITIES DEPICTED HEREON ARE ACCORDING TO SURFACE MARKS PROVIDED BY OTHERS, AND WILSON CAN NOT AND WILL NOT GUARANTEE THE CORRESPONDENCE BETWEEN THE MARKS AND THE EXTANT UTILITIES. UTILITIES MAY EXIST THAT WERE NOT MARKED AT THE TIME OF THIS SURVEY.

4. THIS SURVEY WAS PERFORMED WITHOUT THE BENEFIT OF A CURRENT TITLE REPORT, AND THE EXISTENCE OF EASEMENTS OF RECORD THAT MAY AFFECT THE PROPERTY'S USE WAS NOT INVESTIGATED IN THE COURSE OF THIS SURVEY.

SURVEY CONTROL POINTS (NAD83/07, NGVD29)

——CB—— = COMPOST BERM

PUMP STATION #2 – TESC PLAN

PROJECT WIDE BMPS

THE FOLLOWING BMPS SHALL BE IMPLEMENTED THROUGHOUT THE ENTIRE PROJECT TO THE MAXIMUM EXTENT POSSIBLE:

BMP C101 PRESERVING NATURAL VEGETATION. CONTRACTOR SHALL CLEAR AND DISTURB ONLY AREAS REQUIRED TO CONSTRUCT IMPROVEMENTS AND SHALL DILIGENTLY MINIMIZE DISTURBED AREA.

BMP C102 BUFFER ZONES. CONTRACTOR SHALL MARK CLEARING LIMITS AND KEEP ALL EQUIPMENT AND CONSTRUCTION DEBRIS OUT OF NATURAL AREAS.

BMP C120 PERMANENT SEEDING & PLANTING. CONTRACTOR SHALL COMPLETE REQUIRED LANDSCAPING AS RAPIDLY AS POSSIBLE. ALL OTHER DISTURBED AREAS OUTSIDE OF PAVED AREAS SHALL BE HYDROSEEDED AS RAPIDLY AS POSSIBLE WITH SUITABLE SEED-MULCH-FERTILIZER MIX FOR LOCAL CLIMATE.

BMP C121 MULCHING . CONTRACTOR SHALL MULCH ALL LANDSCAPED AREAS AS RAPIDLY AS POSSIBLE.

BMP C130 SURFACE ROUGHENING. CONTRACTOR SHALL ROUGHEN DISTURBED AREAS PRIOR TO PERMANENT SEEDING AND PLANTING.

BMP C140 DUST CONTROL. CONTRACTOR SHALL KEEP DUST FROM CONSTRUCTION ACTIVITIES AND EXPOSED SOILS TO A MINIMUM.

BMP C160 CERTIFIED EROSION CONTROL LEAD (MUST BE EMPLOYED BY GENERAL CONTRACTOR AND ON SITE DURING CONSTRUCTION.)

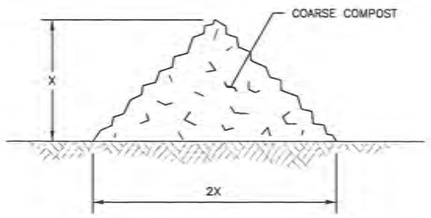
AREA SPECIFIC BMPs

THE FOLLOWING BMPs SHALL BE USED IN LOCATIONS IDENTIFIED ON THE SITE PLAN:

BMP C233 SILT FENCE. CONTRACTOR SHALL INSTALL SILT FENCE AT LOCATIONS NOTED ON PLANS.

BMP C220 CATCH BASIN INSERT. CONTRACTOR SHALL INSTALL INSERT AT LOCATIONS NOTED ON PLANS.

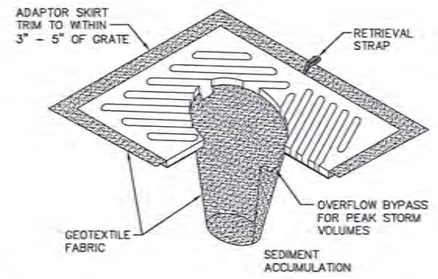
COMPOST BERM. CONTRACTOR SHALL INSTALL COMPOST BERM AT LOCATIONS NOTED ON PLANS.



X = 1.0' FOR SLOPES 4H:1V OR FLATTER

X = 1.5' FOR SLOPES STEEPER THAN 4H:1V

COMPOST BERM
NOT TO SCALE



NOTES:

1. INSERT SHALL BE INSTALLED PRIOR TO CLEARING AND GRADING ACTIVITY, OR UPON PLACEMENT OF A NEW CATCH BASIN.
2. SEDIMENT SHALL BE REMOVED FROM THE UNIT WHEN IT BECOMES HALF FULL .
3. SEDIMENT REMOVAL SHALL BE ACCOMPLISHED BY REMOVING THE INSERT, EMPTYING, AND RE-INSERTING IT INTO THE CATCH BASIN.

BMP C-220
CATCH BASIN INSERT
NOT TO SCALE

BID DOCUMENTS

BMP C233 – SILT (FILTER FABRIC) FENCE

PURPOSE: USE OF A SILT FENCE REDUCES THE TRANSPORT OF COARSE SEDIMENT FROM A CONSTRUCTION SITE BY PROVIDING A TEMPORARY PHYSICAL BARRIER TO SEDIMENT AND REDUCING THE RUNOFF VELOCITIES OF OVERLAND FLOW.

INSTALLATION: USE DOWN SLOPE OF DISTURBED AREAS AS SHOWN ON THE PLAN AND AS NEEDED TO RESPOND TO SITE SPECIFIC CONDITIONS. GEOTEXTILE SHALL MEET THE FOLLOWING STANDARDS: POLYMETRIC MESH AOS (ASTM D4751) = 0.60 MM MAXIMUM FOR SLIT FILM WOVENS, 0.30 MM MAXIMUM FOR ALL OTHER GEOTEXTILES TYPES, AND 0.15 MM FOR ALL FABRIC TYPES, WATER PERMITTIVITY (ASTM D4491) = 0.2 SEC(-1) MINIMUM, GRAB TENSILE STRENGTH (ASTM D4632) = 180 POUNDS MINIMUM FOR EXTRA STRENGTH FABRIC, 100 POUNDS MINIMUM FOR STANDARD STRENGTH FABRIC, GRAB TENSILE ELONGATION (ASTM D4632) = 30% MAXIMUM, ULTRAVIOLET RESISTANCE (ASTM D4355) = 70% MINIMUM.

STANDARD STRENGTH FABRICS SHALL BE SUPPORTED WITH WIRE MESH, CHICKEN WIRE, 2-INCH X 2-INCH WIRE, SAFETY FENCE, OR JUTE MESH TO INCREASE THE STRENGTH OF THE FABRIC. SILT FENCE MATERIALS ARE AVAILABLE THAT HAVE SYNTHETIC MESH BACKING ATTACHED.

THE MINIMUM HEIGHT OF THE TOP OF THE SILT FENCE SHALL BE 2 FEET AND THE MAXIMUM HEIGHT SHALL BE 2.5 FEET.

MAINTENANCE: INSPECT THE FENCE AFTER RAINFALL EVENTS FOR SEDIMENT DEPOSITS UPSTREAM OF THE FENCE. REMOVE SEDIMENT DEPOSITS WHEN THEY REACH A DEPTH OF APPROXIMATELY 8 INCHES DEEP. REPLACE FILTER FABRIC FENCES DAMAGED BY CONSTRUCTION EQUIPMENT OR ULTRAVIOLET BREAKDOWN.

SHEET C2.1 OF 39

TEMPORARY EROSION & SEDIMENTATION CONTROL PLAN

T.E.S.C. NARRATIVE –
(ORGANIZED PER DOE's BASIC ELEMENTS #1–12)

ELEMENT #1: MARK CLEARING LIMITS
Prior to beginning land disturbing activities, including clearing and grading, all clearing limits, sensitive areas and their buffers, and trees that are to be preserved within the construction area should be clearly marked, both in the field and on the plans, to prevent damage and offsite impacts. Plastic, metal, or stake wire fence may be used to mark the clearing limits.

ELEMENT #2: ESTABLISH CONSTRUCTION ACCESS
Construction vehicle access and exit will occur via the existing access off Main Street. Access/egress will be limited to this one location. The access point shall be stabilized near the project site using track–clean plates to minimize the tracking of sediment into the parking lot or onto public roads. In place of track clean plates, contractor shall provide adequate provisions to ensure that no sediment is tracked off the construction site. In the event that sediment tracking occurs, contractor shall remove all tracked sediment immediately.

Wheel wash or tire baths, if required, shall be located on–site.

The parking lot access point will be cleaned thoroughly at the end of each day, or more frequently during wet weather, if necessary. Sediment shall be removed from roads by shoveling or pickup sweeping and shall be transported to a controlled sediment disposal area. Street washing will be allowed only after sediment is removed in this manner.

ELEMENT #3: CONTROL FLOW RATES
Properties and waterways downstream from this project shall be protected from erosion due to increases in the volume, velocity, and peak flow rate of stormwater runoff from the project site. Flow controls shall be implemented as early in the project construction phase as is practicable to mitigate flow rates.

The Ecology Manual requires a downstream analysis if changes in flows could impair or alter conveyance systems, stream banks, bed sediment or aquatic habitat. Since the proposed construction site is predominantly flat, and compost berms will be installed during construction, increased downstream flow rates are not anticipated during construction. No runoff will discharge directly from the site.

ELEMENT #4: INSTALL SEDIMENT CONTROLS
To the maximum extent possible, the duff layer, native topsoil, and natural vegetation shall be retained in an undisturbed state.

Prior to leaving the construction site, stormwater runoff from disturbed areas shall pass through a sediment pond or other appropriate sediment removal BMP. Runoff from fully stabilized areas may be discharged without a sediment removal BMP, but must meet the flow control performance standard of Element #3. Full stabilization means concrete or asphalt paving; quarry spalls used as ditch lining; or the use of rolled erosion products, a bonded fiber matrix product, or vegetative cover in a manner that will fully prevent soil erosion. Sediment ponds, vegetated buffer strips, sediment barriers or filters, dikes, and other BMPs intended to trap sediment on–site shall be constructed as one of the first steps in grading. These BMPs shall be functional before other land disturbing activities take place.

Earthen structures such as dams, dikes, and diversions shall be seeded and mulched according to the timing indicated in Element #5.

As a part of this project BMPs intended to trap sediment on site shall be implemented as one of the first steps in construction. Runoff will not discharge directly from the site.

ELEMENT #5: STABILIZE SOILS
The majority of the site is flat with some steeper slopes located near the bridge. During construction, all exposed and unworked soils shall be stabilized by application of effective BMPs that protect the soil from the erosive forces of raindrop impact and flowing water, and wind erosion.

From October 1 through April 30 of each year, no soils shall remain exposed and unworked for more than 2 days. From May 1 to September 30 of each year, no soils shall remain exposed and unworked for more than 7 days. This condition applies to all soils on site, whether at final grade or not.

Applicable practices include, but are not limited to, temporary and permanent seeding, sodding, mulching, plastic covering, soil application of polyacrylamide (PAM), early application of gravel base on areas to be paved, and dust control.

Soil stabilization measures selected shall be appropriate for the time of year, site conditions, estimated duration of use, and potential water quality impacts that stabilization agents may have on downstream waters or ground water.

Soil stockpiles must be stabilized and protected with sediment trapping measures.

Work on trenching for utilities shall not exceed the capability of the individual contractor for his portion of the project to install the bedding materials, utilities, backfill, and to re–stabilize the disturbed soils, meeting the timing condition listed above.

At the discretion of the Owner, those sites unable to maintain the quality of their stormwater discharge may be required to provide soil stabilization to all exposed soil areas regardless of the working status of the area. Upon written notification, the Contractor shall provide full stabilization of all exposed soil areas within 24 hours.

During construction, BMPs will be followed to ensure that exposed soils are protected and stabilized. Stockpiles shall be covered and exposed soils shall be covered with straw, mulch or other acceptable methods. Construction shall take place during the summer months, and dust control measures will be practiced. After construction, exposed, unpaved surfaces disturbed by construction activities will be hydro–seeded or mulched.

ELEMENT #6: PROTECT SLOPES
The majority of the site is flat and stable. Sloped cuts near the bridge will be stabilized with netting or seeding.

Cut and fill slopes shall be designed and constructed in a manner that will minimize erosion. The erosion control design shall take into account the site's soil type and its potential for erosion. Runoff velocities shall be reduced by minimizing the continuous length of slope with terracing and diversions, by reducing slope steepness, and by roughening slope surface.

Upslope drainage and run–on waters from off–site shall be diverted with interceptors at the top of slope. Off–site stormwater shall be handled separately from stormwater generated on the site. Diversion of off–site stormwater around the site may be a viable option. Any diverted flows shall be redirected to the natural drainage location at or before the property boundary.

Drainage shall be provided to remove ground water intersecting the slope surface of exposed soil areas.

Excavated material shall be placed on the uphill side of trenches, consistent with safety and space considerations. Check dams shall be placed at regular intervals within trenches that are cut down a slope.

ELEMENT #7: PROTECT DRAIN INLETS
All existing storm drain inlets and those made operable during construction shall be protected so that stormwater runoff does not enter the conveyance system without first being filtered or treated to remove sediment.

All approach roads shall be kept clean, and all sediment and street wash water shall not be allowed to enter storm drains without prior and adequate treatment unless treatment is provided before the storm drain discharges to water of the State.

ELEMENT #8: STABILIZE CHANNELS AND OUTLETS
All temporary on–site conveyance channels shall be designed, constructed and stabilized to prevent erosion from the expected velocity of flow from a 2 year, 24–hour frequency storm for the developed condition.

Stabilization, including armoring material, adequate to prevent erosion of outlets, adjacent stream banks, slopes and downstream reaches shall be provided at the outlets of all conveyance systems.

ELEMENT #9: CONTROL POLLUTANTS
All pollutants, including waste materials and demolition debris, that occur onsite will be handled and disposed of in a manner that does not cause contamination of stormwater.

Cover, containment, and protection from vandalism shall be provided for all chemicals, liquid products, petroleum products, and non–inert wastes present on the site. On–site fueling tanks shall include secondary containment.

On–site maintenance and repair of heavy equipment and vehicles involving oil changes, hydraulic system drain down, solvent and de–greasing cleaning operations, fuel tank drain down and removal, and other activities which may result in discharge or spillage of pollutants to the ground or into stormwater runoff must be conducted using spill prevention measures, such as drip pans. Contaminated surfaces shall be cleaned immediately following any discharge or spill incident. Emergency repairs may be performed on–site using temporary plastic placed beneath and, if raining, over the vehicle.

Wheel wash, or tire bath wastewater, shall be discharged to a separate on–site treatment system or to the sanitary sewer.

Concrete work that has not cured will be covered during rainfall to prevent increased stormwater pH as necessary to prevent violations of water quality standards. Management of pH–modifying sources shall prevent contamination of runoff and stormwater collected on the site. These sources include, but are not limited to, bulk cement, new concrete washing and curing waters, waste streams generated from concrete grinding and sawing, exposed aggregate processes, and concrete pumping and mixer washout waters.

Application of agricultural chemicals, including fertilizers and pesticides is not anticipated under this contract. If agricultural chemicals are to be used, their application shall be conducted in a manner and at application rates that will not result in loss of chemical to stormwater runoff. Manufacturers' recommendations shall be followed for application rates and procedures.

ELEMENT #10: CONTROL DE–WATERING
The following options will be implemented for dewatering as necessary.

Clean, non–turbid de–watering water, such as well–point ground water, will be discharged in a dispersed manner to thick natural vegetation near the site. This vegetated discharge location will be well away from surface waters, wetlands, or lagoon berms on site. This dewatering flow must not cause erosion or flooding of the receiving waters, and these clean waters shall not be routed through sediment ponds with stormwater.

Turbid dewatering water will be discharged to a setting tank or filter prior to being discharged to as described above for clean water.

Final discharge point must be coordinated with the Owner and Engineer.

ELEMENT #11: MAINTAIN BMPs
All temporary and permanent erosion and sediment control BMPs will be maintained and repaired as needed to assure continued performance of their intended function. Maintenance and repair shall be conducted in accordance with BMP specifications.

Sediment control BMPs shall be inspected weekly of after a runoff–producing storm event during the dry season and daily during the wet season. Because this project disturbs less than one acre of area, a certified erosion control lead need not be designated for the site. The contractor shall be responsible for all required inspection, maintenance, and repair of site BMPs.

All temporary erosion and sediment control BMPs shall be removed within 30 days after final site stabilization is achieved or after the temporary BMPs are no longer needed. Trapped sediment shall be removed.

ELEMENT #12: MANAGE THE PROJECT
The construction contractor is responsible for providing and maintaining these and such additional BMPs, as may be required to prevent erosion, control sediment, and prevent water pollution.

The contractor will be required, where feasible, to phase the project in order to prevent, to the maximum extent practicable, the transport of sediment from the development site during construction. Revegetation of exposed areas and maintenance of that vegetation shall be an integral part of the clearing activities for any phase.

When establishing the permitted clearing and grading areas, consideration will be given to minimizing removal of existing trees and minimizing disturbance/compaction of native soils except as needed for building purposes. Permitted clearing and grading areas and any other areas required to preserve critical or sensitive areas, buffers, native growth protection easements, or tree retention areas, will be delineated on the site plans and the development site.

The Owner and Engineer have evaluated, with input from utilities and other contractors, the stormwater management requirements for the entire project, including the utilities, when preparing the Construction TESC.

(20) = REMOVE & REPLACE EXISTING SKYLIGHTS.

INSPECTION NOTES:

1. SUBSEQUENT TO THE INITIATION OF BYPASS PUMPING AND THE SHUTDOWN OF THE STATION, THE STATION WELL SHALL BE DRAINED, CLEANED, AND INSPECTED FOR LEAKS PRIOR TO INSTALLATION OF ANY COATINGS. IF ANY LEAKS ARE IDENTIFIED, THE CONTRACTOR WILL SUBMIT TO THE CITY (REVIEW AND APPROVAL), A STEP-BY-STEP PLAN TO SEAL THE WET WELL. WORK ASSOCIATED WITH SEALING ANY LEAKS IN THE WET WELL WILL BE PAID FOR ON A FORCE ACCOUNT BASIS THROUGH THE BID ITEM SET ASIDE FOR THAT WORK. COSTS ASSOCIATED WITH NORMAL REPAIRS TO THE WET WELL, NOT ASSOCIATED WITH LEAK REPAIR, WHICH ARE NECESSARY FOR THE INSTALLATION OF THE WET WELL COATINGS SHALL BE CONSIDERED INCIDENTAL TO THE CONTRACT.
2. AFTER INITIAL SHUTDOWN OF THE STATION, THE ENGINEER SHALL INSPECT THE SPIRAL STAIRS AND WALKWAY IN THE WET WELL TO DETERMINE IF ANY STRUCTURAL REPAIRS TO THE STRUCTURE OR ITS CONNECTIONS ARE NECESSARY. THE CONTRACTOR SHALL BE RESPONSIBLE FOR PROVIDING ALL SAFETY MEASURES, INCLUDING VENTILATION AND CONFINED SPACE ENTRY REQUIREMENTS, TO FACILITATE THIS INSPECTION WORK. WORK ASSOCIATED WITH ANY STRUCTURAL REPAIRS RESULTING FROM THIS INSPECTION SHALL BE PAID FOR ON A FORCE ACCOUNT BASIS THROUGH THE BID ITEM SET ASIDE FOR THAT WORK.

W:\2014\2014-079 - COF Pump Stations 2&3 Upgrades\Dwg\C3.1 PROPOSED SITE PLAN - BRIDGE CONNECTION.dwg, 6/7/2016 1:38:04 PM, ADROPLOT 11X17 UNREGISTERED.pc3, RDN

NO.	REVISIONS	BY	DATE

NOTES:

1. NO CONSTRUCTION WORK OR STAGING SHALL BE PERFORMED WITHIN THE EXISTING BNSF RAILROAD RIGHT-OF-WAY.
2. ALL UNDERGROUND UTILITY PIPING TO BE INSTALLED IN ACCORDANCE WITH DETAIL (4/C4.1)
3. PRIOR TO COMMENCING ANY UNDERGROUND WORK, THE CONTRACTOR SHALL POTHOLE ALL UTILITIES AT ALL PROPOSED CROSSING AND CONNECTION POINTS TO CONFIRM THEIR DEPTHS AND PLAN LOCATIONS.
4. FOR PUMP STATION TEMPORARY BYPASS PUMPING SCHEMATIC, SEE DETAIL (4/C4.2)
5. HYDROSEED ALL DISTURBED AREAS NOT PAVED, GRAVELED OR COVERED WITH RIP RAP.

PAVING LEGEND

= REPLACEMENT ASPHALT SECTION

= NEW ASPHALT SECTION

= ASPHALT OVERLAY

KEYED NOTES

(1) = MATE OVERLAY ASPHALT INTO THE BACK OF EXISTING SIDEWALK

(2) = NEW ASPHALT OVERLAY PER DETAIL (2/C4.1)

(3) = NEW ASPHALT SECTION PER DETAIL (2/C4.1)

(4) = REPLACE ASPHALT SECTION PER DETAIL (1/C4.1)

(5) = REPLACE ±30 LF SIDEWALK AND CURB & GUTTER TO MATCH EXISTING. REPLACE DRIVEWAY CUT RAMP IN KIND.

(6) = NEW BOLLARD PER DETAIL (6/C4.2)

(7) = TELEPHONE PEDESTAL RELMOVED BY FRONTIER COMMUNICATIONS PRIOR TO CONSTRUCTION.

(8) = PROTECT EXISTING ELECTRICAL VAULT

(9) = NEW CONCRETE BARRIER (TWO SECTIONS) PER DETAIL (1/C4.3)

(10) = NEW 24-FT WIDE DOUBLE-SWING BARRIER GATE PER DETAIL (4/C4.3)

(11) = NEW STANDBY GENERATOR. REFERENCE ELECTRICAL DRAWINGS FOR DETAILS.

(12) = NEW STANDBY GENERATOR PLATFORM. REFERENCE STRUCTURAL PLANS FOR DETAILS.

(13) = NEW 500-GALLON PROPANE TANK. CONTRACTOR TO COORDINATE WITH THE PROPANE SUPPLIER TO RENT AND INSTALL THE TANK. ALL COST ASSOCIATED WITH COORDINATING THIS WORK SHALL BE CONSIDERED INCIDENTAL TO THE CONTRACT.

(14) = NEW PROPANE TANK PLATFORM. REFERENCE STRUCTURAL PLANS FOR DETAILS.

(15) = NEW BURIED 4"ø GATE VALVE PER DETAIL (3/C4.2)

(16) = REPLACE EXISTING DRAINAGE STRUCTURE WITH FOUR SECTIONS OF PRECAST CONCRETE TRENCH PER DETAIL (5/C4.2)

(17) = EXISTING WALL-MOUNTED LIGHT TO BE REPLACED. REFERENCE ELECTRICAL PLANS FOR DETAILS.

(18) = NEW FLOWMETER VAULT PER DETAIL (2/C4.4)

(19) = NEW BYPASS SNORKLE VAULT PER DETAIL (4/C4.4)

KEYED NOTES (CON'T)

(20) = NEW BURIED 12"ø GATE VALVE PER DETAIL (3/C4.2)

(21) = RELOCATE THE EXISTING 1"ø WATER LINE AROUND THE METER VAULT BYPASS. SEE NOTE 3.

(22) = NEW GAS SERVICE. ROUTE PIPING TO NEW GAS METER TO BE INSTALLED ADJACENT TO THE NEW GENERATOR PLATFORM. REFERENCE ELECTRICAL DRAWINGS FOR LOCATION OF NEW METER AND CONNECTION POINT TO THE GENERATOR. CONTRACTOR RESPONSIBLE FOR COORDINATING WITH CASCADE NATURAL GAS TO COMPLETE THIS WORK.

(23) = NEW POTABLE REDUCED PRESSURE BACKFLOW PREVENTER ASSEMBLY WITH ALUMINUM INSULATED ENCLOSURE PER DETAIL (3/C4.1)

(24) = NEW 1" DIA. WATER SERVICE AND METER PER CITY OF FERNDALE STANDARDS. CONNECT TO EXISTING SERVICE LINE.

(25) = APPROX. LOCATION OF EXISTING 12" SEWER FORCE MAIN (BURIED) TO BE ABANDONED. SEE NOTE 3.

(26) = NEW 12" D.I. SEWER FORCE MAIN. SEE SHEET C3.1 FOR DETAILS. REFERENCE NOTE 3 THIS SHEET.

(27) = APPROX. LOCATION OF EXISTING 12" WATER MAIN. SEE NOTE 3.

(28) = ABANDONED 6" WATER LINE, APPROXIMATE LOCATION.

(29) = REPLACE MANHOLE FRAME AND COVER WITH A GASKETED WATERTIGHT FRAME AND COVER. REBUILD GRADE RINGS AS REQUIRED TO REACH FINISH GRADE OF NEW PAVEMENT.

(30) = CLEAR DEBRIS AND WEEDS AWAY FROM THE BASE OF THE MASONRY STRUCTURE. RIP RAP BASE OF SLOPE AND PLACE 1'-0" WIDE BY 2-IN. THICK LAYER OF CSTC AROUND STRUCTURE.

KEYED NOTES (CON'T)

(31) = RELOCATE EXISTING SIGN AS DIRECTED BY CITY OF FERNDALE.

(32A) = NEW 2"ø TELEPHONE CONDUIT & PEDESTAL. CONTRACTOR TO COORDINATE WITH THE TELEPHONE UTILITY FOR INSTALLATION . TELEPHONE UTILITY TO INSTALL CONDUIT & PEDESTAL. CONTRACTOR TO PROVIDE TRENCHING & BACKFILL.

(32B) = NEW 2"ø TELEPHONE CONDUIT TO BE INSTALLED BY CONTRACTOR FROM PEDESTAL TO PUMP STATION. BRING CONDUIT ABOVE GRADE AT BUILDING AND CAP.

(33) = NEW 2"ø FIBER OPTIC CONDUIT. REFERENCE ELECTRICAL PLANS FOR ADDITIONAL DETAILS.

(34) = NEW GATE STOP, 2 TYP. PER DETAIL (4/C4.3)

(35) = SCHEMATIC LOCATION OF NEW UNDERGROUND PROPANE LINE FROM TANK TO GENERATOR. PIPE SIZE TO BE DETERMINED BY GENERATOR MANUFACTURER.

(11) = NEW WET WELL LADDER PER DETAIL 3/M2.2

(12) = EXISTING 4" ROOF DRAIN TO BE REPLACED WITHIN WET WELL. INSTALL NEW STAINLESS STEEL SUPPORTS FOR DRAIN.

(13) = EXISTING PLATFORM, PLATFORM SUPPORTS AND HANDRAIL TO BE CLEANED PER SPEC. SECTION 09900.

(14) = EXISTING SUCTION SPOOL THROUGH WALL. PROTECT DURING CONSTRUCTION FOR REUSE. SEE NOTE 1.

(15) = NEW ELECTRIC UNIT HEATER, MOUNTED VERTICALLY.

(16) = 24" CONCRETE SEWER INLET

(17) = REPLACE EXISTING LOUVER PER DETAIL 3/C4.3

(18) = EXISTING FAN OPENING TO BE BRICKED UP.

(19) = EXISTING FIXED LOUVER VENT TO BE REPLACED IN KIND.

(20) = FALL RESTRAINT CEILING EYE BOLT; FINAL LOCATION PER CITY STAFF. SEE DETAIL 5/S1.4

(21) = NEW AIR GAP WATER SYSTEM PER DETAIL 4/M2.2

(22) = NEW WALL HANGING STEEL DESK, TENNSCO WALL HANGING FOREMAN'S DESK MODEL SR-59, OR APPROVED EQUAL OR APPROVED EQUAL.

SCALE 2 0 2 4 FEET

KEYED NOTES

1 = NEW ROOF DRAIN PER DETAIL 5/C4.3
2 = EXISTING TELEMETRY CABINET. REFERENCE ELECTRICAL PLANS FOR DETAILS.
3 = 24" CONCRETE SEWER INLET.
4 = SPIRAL STAIRS, HANDRAILING AND GRATING TO BE CLEANED PER SPEC. SECTION 09900.
5 = NEW 12"ø DUCT AND DUCT SUPPORTS TO REPLACE EXISTING "WET SIDE" AND "DRY SIDE" VENTILATION SYSTEMS. DUCT SUPPORTS PER DETAIL 6/M2.1
6 = FALL RESTRAINT EYE BOLT; FINAL LOCATION PER CITY STAFF. SEE DETAIL 5/S1.4
7 = NEW 3'-0" x 3'-0" FLOOR OPENINGS FITTED WITH GRATING PER DETAIL. TYPICAL OF 3. 8/S1.4
8 = NEW OVERHEAD TROLLEY BEAM PER DETAIL 7/S1.4
9 = NEW 2'-0" x 2'-0" SKYLIGHT PER DETAIL 2/C4.3
10 = NEW ACCESS DOORS. REFERENCE SHEET C3.4 FOR ADDITIONAL DETAILS.
11 = NEW WET WELL LADDER PER DETAIL 3/M2.2
12 = EXISTING 4" ROOF DRAIN TO BE REPLACED WITHIN WET WELL. INSTALL NEW STAINLESS STEEL SUPPORTS FOR DRAIN.
13 = EXISTING PLATFORM, PLATFORM SUPPORTS AND HANDRAIL TO BE CLEANED PER SPEC. SECTION 09900.
14 = EXISTING SUCTION SPOOL THROUGH WALL. PROTECT DURING CONSTRUCTION FOR REUSE. SEE NOTE 1.
15 = TYPE 1 PIPE SUPPORT. SEE DETAIL 1/M2.1
16 = TYPE 4 PIPE SUPPORT. SEE DETAIL 4/M2.1
17 = TYPE 1 DUCT SUPPORT. SEE DETAIL 6/M2.1
18 = NEW CONCRETE PUMP BASE PER DETAIL 6/S1.4
19 = NEW ROOF EXHAUST BLOWER UNIT PER DETAIL 2/C4.4

NOTES:

1. CONTRACTOR SHALL EXPOSE EXISTING SUCTION PIPE THROUGH DIVIDER WALL FOR INSPECTION BY ENGINEER. CONTRACTOR SHALL CORE & REPLACE PIPING IF DIRECTED BY ENGINEER.
2. THE LONG RADIUS BEND USED ON PUMP 2 WILL RAISE PUMP 2 (AND DISCHARGE) APPROXIMATELY 5" HIGHER THAN PUMPS 1 & 3.
3. ELBOW STAND PIPE SUPPORT ASSOCIATED WITH THIS ELBOW NOT SHOWN FOR CLARITY.
4. POTABLE WATER PIPING IN THE MOTOR ROOM NOT SHOWN.

SCHEDULE A - PIPING MATERIALS*

ITEM	DESCRIPTION
1	12"x8" DUCTILE IRON TEE, FXF
2	8" DUCTILE IRON SPOOL, FXF
3	8" GATE VALVE W/ HANDWHEEL OPERATOR, FXF
4	PRESSURE GAGE ASSEMBLY
5	8" RESTRAINED FLANGED COUPLING ADAPTER PER SPECS
6	8"X6" 90° BASE BEND, DUCTILE IRON, FXF, SEE NOTE 3

W:\2014\2014-079 - COF Pump Stations 2&3 Upgrades\Dwg\S1.1-S1.5 GEN AND TANK PLAN\DWG\S.dwg, 6/7/2016 1:39:55 PM, ACROPLOT 11X17 UNSIGNED.pc3, RDN

STRUCTURAL NOTES

BUILDING CODE CRITERIA

1. All construction is to comply with the 2012 International Building Code (IBC).
2. Loads:
   Catalog load allowance for generator and propane tank.
   100 psf uniform live load for cantilever platforms.
   Wind loads are negligible. Earthquake parameters are as follows:
   SS = 0.95 S1 = 0.32, Soil "E," I_e = 1.5
3. Special Inspections
   No special inspections are required. Concrete work is fully supported on grade, and the design concrete strength of 3500 psi is for reasons of durability.
4. Structural Observation
   The Structural Engineer of record will perform Structural Observations as defined in IBC Section 1702, as required. Note that Structural Observation does not constitute Special Inspection.

01000 GENERAL

1. Employ good standards of workmanship throughout. Provide all materials and perform all construction as indicated. Secure the prior written approval of the Engineer of Record (aka EOR, who is the Engineer whose name is on these drawings) for substitutions.
2. In case of conflict between these notes and the drawings, the more stringent will govern.
3. Verify all dimensions in the field.
4. These drawings and the designs herein are copyrighted by Wilson Engineering, and are for use on this project only.
5. **Do not scale drawings.**
6. The structure as shown on these drawings is designed to be stable and to resist the indicated loads in the completed condition. The drawings do not indicate the method or sequence of construction. The contractor is solely responsible for temporary bracing and shoring, and for safety programs, methods, and procedures of operation for the construction of the design.

01340 SHOP DRAWINGS AND SUBMITTALS

1. Shop drawings shall be submitted before fabrication is started. Allow two weeks for review by the EOR.
2. Shop drawings and submittals shall be clear and legible. Each submittal shall include:
   A. Name of project, fabricator's name, General Contractor, date, and unique drawing title and/or number including revision number.
   B. A blank of 4" x 4" space for Structural Engineer's review stamp.
3. Resubmittals shall be clearly identified as revisions, and all changes clearly marked. The EOR will not be responsible to find unmarked changes.

02220 FOUNDATIONS

1. Spread footings are designed for a maximum total bearing pressure of 1000 psf maximum.
2. Remove all topsoil and organic material from the area below the foundation, and use engineered fill if necessary to provide firm bearing.
3. Place concrete for footings against firm bearing soil. No geotechnical investigation has been performed for this project. Soils are assumed to be sandy-silt or silty-sands. Confirm soils types upon completion of excavation to footing elevation, and notify the engineer if any areas differ from this assumption.
4.

03300 REINFORCED CONCRETE AND ACCESSORIES

1. Reinforcing bars shall be ASTM A615, Grade 60. Do not weld rebar.
2. Bar detailing not shown otherwise, and support of reinforcing bars in forms, shall conform to the Concrete Reinforcing Steel Institute (CRSI) Manual of Standard Practice.
3. Provide 3" minimum cover from face of bars to face of concrete.
4. All concrete shall be ready-mix. Comply with requirements of ASTM C 94 and as follows
   Aggregate Per: ASTM C33 Cement Shall be: Type I or II per ASTM C150
   Admixtures for air entrainment and water reduction shall be per ASTM C260 & ASTM C494 Type A, respectively.
5. Properties including 28-day strengths shall be as follows:

Application	f'c (psi)	w/c (max)	aggregate (max)	Air %
A. Foundation	3500	0.50	1"	6.0

6. Hold all bolts, anchors, dowels, reinforcing bars and metal inserts firmly and accurately in place before concrete is poured; do not insert ("stab") after pouring concrete.
7. Post-installed adhesive anchors bolts shall be of steel conforming to the requirements of the applicable ICC-ES report for the adhesive system. Make and clean holes with equipment per the ICC-ES report. See the drawings for embedment, or use 5" minimum.
   Accepted adhesive products include:
   A. ITW-Ramset Company: Epcon G5 System
   B. Hilti Inc: RE-500 SD System
   C. Simpson Strong-Tie Company: SET-XP Epoxy
   D. Other systems with written approval of the Engineer of Record
   For any product to be accepted, it shall have a currently valid ICC-ES report with test results indicating that it is suitable for use in cracked concrete. Use in accordance with manufacturer's recommendations, including ambient temperature and moisture conditions at time of use.

05120 STRUCTURAL STEEL

1. Materials (except as noted in drawings):
   All materials shall be new stock, unless noted otherwise.
   Channel Shapes: ASTM A36
   Plates and bars: ASTM A36 (A529, A572, A588 optional)
   Steel Pipe: ASTM A53, Grade B
   Bolts, Regular: ASTM A307
   Galvanizing: Shapes and weldments ASTM A123
   Bolts and hardware ASTM A153
2. Minimum welds:
   Welds not specified shall be 3/16" continuous fillet welds, or minimum size per AISC, whichever is greater. All weld sizes are effective sizes; increase as required if gaps exist at meeting surfaces.
3. Welding shall be by WABO Certified welders and shall be as detailed or as specified by American Welding Society Standards D1.1.
4. Field welding is not permitted.
5. All steel shall be hot dip galvanized after fabrication except checkerplate which shall be galvanized separately before attachment to the platform structure.
6. Checkerplate shall conform to ASTM A786 with a raised diamond pattern and a durable factory applied non-skid finish. Connect to framing with TEKS screws @ 8" O.C., OR powder actuated fasteners @ 8" O.C., diameter, length and powder charge per PAF manufacturer.

ELIZABETH ANNE STERLING — STATE OF WASHINGTON — 41548 — REGISTERED — PROFESSIONAL ENGINEER

ENGINEERING RESPONSIBILITIES:
STRUCTURE BY CHARLES WAUGH, P.E.
SITING, ELEVATIONS, AND ARRANGEMENT BY ELIZABETH STERLING, P.E.

W:\2014\2014-079 - COF Pump Stations 2&3 Upgrades\Dwg\S1.1-S1.5 GEN AND TANK PLATFORMS.dwg, 6/7/2016 1:49:01 PM, ACROPLOT 11X17 UNSCREENED.pc3, EDN

RACEWAYS AND CONDUCTORS

- MANUFACTURERS CORD/CABLE
- HEAT TAPE ON PIPING
- FLEXIBLE CONDUIT
- TWISTED SHIELDED PAIR
- S — SEWER LINE
- OE — OVERHEAD ELECTRICAL
- EE — EXISTING CONDUIT UNDERGROUND
- CONDUIT EXPOSED
- CONDUIT BELOW GRADE OR CONCEALED
- CONDUIT CAPPED
- CONDUIT BENT UP OR TOWARD
- CONDUIT BENT DOWN OR AWAY
- GROUNDING CAD WELD CONNECTION
- CONDUCTORS NOT CONNECTED
- CONDUCTORS CONNECTED
- CONDUIT SEALS CLASS 1, DIV. 1 EXPLOSION PROOF
- NEW EQUIPMENT (STANDARD LINEWEIGHT)
- EXISTING EQUIPMENT (E) (LIGHT LINEWEIGHT)
- EQUIPMENT TO BE REMOVED

LIGHTING AND RECEPTACLES

- 1 / F1 — LED LIGHTING FIXTURE. FIXTURE IDENTIFIER AND SWITCHED CIRCUIT INDICATED. REFER TO LIGHTING SCHEDULE FOR FIXTURE AND LAMP TYPE.
- 1 / F1 — LED LIGHTING FIXTURE WITH EMERGENCY BATTERY PACK
- LIGHTING FIXTURE, EMERGENCY DUAL HEAD WITH INTEGRAL BATTERY PACK. EXIT SIGN WHERE INDICATED.
- LED EXIT SIGN
- LIGHTING FIXTURE, CEILING MOUNTED
- PC — PHOTOELECTRIC CONTROL UNIT. WALL MOUNTED
- LIGHTING FIXTURE, POLE MOUNT
- LIGHTING FIXTURE, WALL MOUNT
- 3 — DUPLEX RECEPTACLE, NUMBER INDICATES CIRCUIT. GFCI WHERE INDICATED
- 3 — FOURPLEX RECEPTACLE, NUMBER INDICATES CIRCUIT.
- 3 — DUPLEX RECEPTACLE MOUNTED 6" ABOVE COUNTER NUMBER INDICATES CIRCUIT.
- 3 — DUPLEX RECEPTACLE FLOOR MOUNTED, NUMBER INDICATES CIRCUIT.
- SPECIAL PURPOSE RECEPTACLE OR DEDICATED EQUIPMENT CONNECTION, AS NOTED.
- TELEPHONE OUTLET
- DATA OUTLET
- SPLIT TELEPHONE DATA OUTLET
- IC — INTERCOM
- 3a — SWITCH, NUMBERS REFER TO SWITCH TYPE AND SWITCHED CIRCUIT.
- J — JUNCTION BOX
- J EX — JUNCTION BOX, EXPLOSION PROOF
- T — THERMOSTAT
- H — HUMIDISTAT

CALLOUTS AND DESIGNATIONS

- A — CONDUIT CALLOUT
- A — TRENCH CALLOUT
- EF-1 — EQUIPMENT CALLOUT
- F1 — LIGHTING FIXTURE CALLOUT: SEE SCHEDULE
- X — DRAWING KEY NOTE CALLOUT
- X — DETAIL NUMBER
- XX — DETAIL IDENTIFIER
- REFERENCE DRAWING NUMBER
- LPA-1,3 — PANEL AND CIRCUIT (EXAMPLE: PANEL LPA, CIRCUITS 1 AND 3)
- PHASE/SWITCHLEG CONDUCTOR
- HOMERUN/CONDUIT
- GROUND CONDUCTOR
- NEUTRAL CONDUCTOR

ELECTRICAL AND POWER DISTRIBUTION

- PANELBOARD 208Y/120V OR 120/240V
- PANELBOARD 480Y/277V
- UTILITY METER
- 5 — MOTOR CONNECTION NUMBER INDICATES HORSEPOWER
- O.L. — THERMAL OVERLOAD RELAY
- 2 — FULL VOLTAGE NON REVERSING MOTOR STARTER NUMBER INDICATES NEMA SIZE
- REDUCED VOLTAGE SOLID STATE STARTER
- VARIABLE FREQUENCY DRIVE
- LINE REACTOR/FILTER
- G — BUS CONNECTION (N=NEUTRAL, G=GROUND)
- 75KW — HEATER, NUMBER INDICATES KW
- 50 — DISCONNECT SWITCH - HP RATED, AS INDICATED
- 50 — DISCONNECT SWITCH (FUSED)
- TRANSFORMER
- CARTRIDGE FUSE AND FUSEHOLDER
- ATS - AUTOMATIC TRANSFER SWITCH MTS - MANUAL TRANSFER SWITCH
- 200/3 — THERMAL MAG CIRCUIT BREAKER, RATING/NO. POLES
- 200/3 MCP — MOTOR CIRCUIT PROTECTOR, RATING/NO. POLES
- GROUND ROD AND WELL
- GROUNDING ELECTRODE
- PULL OUT PLUG-RECEPTACLE/MCC CONNECTION
- BATTERY
- SIDEWALK SNOWMELT

CONTROLS AND INSTRUMENTATION

NORMALLY CLOSED / NORMALLY OPEN

- TEMPERATURE SWITCH - TS
- LEVEL SWITCH - LS
- PRESSURE SWITCH - PS
- LIMIT SWITCH - LS
- CONTACT - CR = CONTROL RELAY, MS-MOTOR STARTER, OR AS INDICATED
- SWITCH - SW
- FLOW SWITCH - FS
- PB — PUSHBUTTON - PB
- TIME DELAY - TD
- HAND / OFF / AUTO — SELECTOR SWITCH. HAND-OFF-AUTO SHOWN. X'S INDICATE CONTACT SWITCHING CONVENTION.
- AM — AMMETER
- VM — VOLTMETER
- GEN — GENERATOR
- MS — MOTOR STARTER
- PFR — PHASE FAIL RELAY
- ETM — ELAPSED TIME METER
- SCT — STARTS COUNTER
- CR — CONTROL RELAY
- TDR — TIME DELAY RELAY
- SV-SOLENOID VALVE
- PT — INSTRUMENT (L=LEVEL, F=FLOW P=PRESSURE)
- R — INDICATING LIGHT, LETTER INDICATES: R-RED, G-GREEN, A-AMBER, W-WHITE, B-BLUE
- D.C. TERMINAL
- A.C. TERMINAL
- FIELD INSTRUMENT
- HORN
- SPEED POTENTIOMETER

STANDARD ABBREVIATIONS

A, AMP	AMPERE
AC	AIR COMPRESSOR
AFF	ABOVE FINISHED FLOOR
AI	ANALOG INPUT POINT (PLC)
AIC	AMPERES INTERRUPTING CAPACITY
AL	ALARM
ALT	ALTERNATOR
AO	ANALOG OUTPUT POINT (PLC)
ATS	AUTOMATIC TRANSFER SWITCH
BAT	BATTERY
BC	BATTERY CHARGER
BH	BLOCK HEATER
BP	BYPASS CONTACTOR
C	CONDUIT (RGS)
CAP	CAPACITOR
CB	CIRCUIT BREAKER
CKT	CIRCUIT
CNT	COUNTER
CP	CONTROL PANEL
CPT	CONTROL POWER TRANSFORMER
CR	CONTROL RELAY
CT	CURRENT TRANSFORMER
CV	CHECK VALVE
DEM	DEMAND
DI	DIGITAL INPUT POINT (PLC)
DO	DIGITAL OUTPUT POINT (PLC)
DWG	DRAWING
E OR (E)	EXISTING DEVICE
EF	EXHAUST FAN
E.O.D.O.	ELECTRICAL OPERATED DRAW OUT
FE	FLOW ELEMENT
FS	FLOW SWITCH
FT	FLOW TRANSMITTER
FU	FUSED
FVNR	FULL VOLTAGE NON-REVERSING
G, GND	GROUND
GEN	GENERATOR
GFCI/GFI	GROUND FAULT CIRCUIT INTERRUPTER
H	HOT, HIGH
HH	HAND HOLE
HID	HIGH INTENSITY DISCHARGE
HOA	HAND-OFF-AUTO
HTR	HEATER
IC	ISOLATION CONTACTOR
ISR	INTRINSICALLY SAFE RELAY

RGS	RIGID GAVLANIZED STEEL (CONDUIT)
RTM	RUN TIME METER
RV	REDUCED VOLTAGE
S	SIGNAL
SA	SURGE ARRESTOR
SE	SERVICE ENTRANCE
SHT	SHEET
SS	STAINLESS STEEL
SSS	SOLID STATE STARTER
SV	SOLENOID VALVE
T	THERMOSTAT
TC	TIME CLOCK
TDR	TIME DELAY
TST	TWISTED SHIELDED THREE CONDUCTOR (TRIAD)
TYP	TYPICAL
UH	UNIT HEATER
UPS	UNINTERUPTABLE POWER SUPPLY
VS	VIBRATION SWITCH
VT	VIBRATION TRANSMITTER
VFD	VARIABLE FREQUENCY DRIVE
VSD	VARIABLE SPEED DRIVE
W	WATT
WHM	WATT HOUR METER
WP	WEATHER PROOF
XFMR	TRANSFORMER
XP	EXPLOSION PROOF
XMTR	TRANSMITTER

PROJECT GENERAL NOTES:

1. THE ELECTRICAL DRAWINGS AND SCHEDULES ARE FUNCTIONAL IN NATURE AND DO NOT SPECIFY EXACT LOCATIONS OF EQUIPMENT OR EQUIPMENT TERMINATIONS. IT IS THE INTENT OF THESE DRAWINGS TO DESCRIBE AND PROVIDE FOR THE FURNISHING, INSTALLING, TESTING AND PLACING IN FULLY OPERATIONAL CONDITION ALL EQUIPMENT, MATERIALS, DEVICES AND NECESSARY APPURTENANCES TO PROVIDE A COMPLETE ELECTRICAL SYSTEM, TOGETHER WITH SUCH OTHER MISCELLANEOUS INSTALLATIONS AND EQUIPMENT SHOWN ON THE DRAWINGS. THE WORK SHALL INCLUDE ALL MATERIALS, APPLIANCES AND APPARATUS NOT SPECIFICALLY MENTIONED HEREIN OR SHOWN ON THE DRAWINGS, BUT WHICH ARE NECESSARY TO MAKE A COMPLETE, FULLY OPERATIONAL INSTALLATION OF ALL ELECTRICAL SYSTEMS SHOWN ON THE DRAWINGS.
2. THIS PROJECT INCLUDES THE INSTALLATION OF PACKAGED EQUIPMENT SYSTEM(S) OR SUB-SYSTEM(S) THAT WILL REQUIRE COORDINATION BETWEEN THE CONTRACTOR AND THE MANUFACTURER TO DETERMINE THE DETAILED INSTALLATION REQUIREMENTS. THE ENGINEER HAS SHOWN GENERAL INSTALLATION INFORMATION FOR THESE SYSTEMS BASED ON THE BEST INFORMATION AVAILABLE AT THE TIME OF DESIGN. WHERE INDICATED ON THE DRAWINGS TO 'PROVIDE A COMPLETE AND OPERATIONAL SYSTEM' THE CONTRACTOR SHALL PROVIDE ALL MATERIALS, INSTALLATION, AND COORDINATION WITH THE MANUFACTURER REQUIRED SO THE EQUIPMENT IS INSTALLED AND OPERATES IN A SATISFACTORY MANNER. MINOR CHANGES IN EQUIPMENT LOCATIONS (LESS THAN 20 FEET), QUANTITY OF TERMINATIONS OR WIRES, JUNCTION BOXES, CONDUIT, ETC SHALL BE INCLUDED IN THE CONTRACT PRICE.
3. CONTRACTOR SHALL COORDINATE WITH OWNER AND UTILITY FOR REMOVAL OF EXISTING EQUIPMENT AND ANY REQUIRED PHASING TO MAINTAIN ALL REQUIRED POWER AND CONNECTIONS .
4. DISPOSE OF ALL DEMO MATERIALS NOT WANTED BY OWNER.
5. COORDINATE WITH OWNER FOR DETAILED EQUIPMENT CONNECTION REQUIREMENTS. GENERAL POWER DISTRIBUTION AND CIRCUIT DESIGNATIONS ARE SHOWN ON THE DRAWINGS.
6. ALL CONDUIT IN NEW WALLS OR CEILINGS SHALL BE CONCEALED WHERE POSSIBLE.
7. ALL ELECTRICAL SERVICE REQUIREMENTS FOR NEW UTILITY SERVICE, TRANSFORMER, METERING, TRENCHING, ETC SHALL BE COORDINATED AND INSTALLED IN STRICT ACCORDANCE WITH OKANOGAN COUNTY PUD REQUIREMENTS. ALL UTILITY INFORMATION MUST BE VERIFIED PRIOR TO BID.
8. THE NUMBER OF CONDUCTORS AND CONDUIT ROUTING WILL VARY BASED ON HOW THE CONTRACTOR ELECTS TO ROUTE AND COMBINE CIRCUITING. THE CONTRACTOR SHALL PROVIDE DETAILED REDLINE MARKUPS ON A DEDICATED SET OF CONSTRUCTION DRAWINGS TO THE ENGINEER UPON COMPLETION OF THE PROJECT FOR PREPARATION OF RECORD DRAWINGS. THIS INCLUDES ACTUAL RACEWAY ROUTING, CONDUCTOR QUANTITIES, PANEL SCHEDULES, RECEPTACLE CONFIGURATIONS AND MOUNTING ELEVATIONS, ETC.
9. ALL MATERIALS SHALL CONFORM TO THE NATIONAL ELECTRICAL CODE ARTICLE 110-14C. WIRING AND CIRCUIT BREAKERS ON THIS PROJECT ARE DESIGNED FOR 75 DEG C OPERATION ABOVE 100 AMPERES; 60 DEG C FOR 100 AMPERES AND BELOW. ALL PRODUCTS FURNISHED ON THIS PROJECT SHALL HAVE ELECTRICAL TERMINATIONS RATED FOR 60 DEG C FOR AMPACITIES OF 100 AMPERES AND BELOW, AND RATED FOR 75 DEG C FOR AMPACITIES ABOVE 100 AMPERES. ALL CONDUCTORS SHALL BE COPPER.

ELECTRICAL SITE PLAN

SCALE: 1" = 10'

GENERAL NOTES:

1. ALL CONDUIT ROUTING IS NOT SHOWN. ELECTRICAL CONTRACTOR SHALL DETERMINE THE BEST ROUTING PATH AND CIRCUIT COMBINATIONS BASED ON FIELD CONDITIONS AND ELECTRICAL CODES.
2. CONDUCTOR AND CONDUIT SIZING SHALL BE AS REQUIRED BY NEC.
3. EQUIPMENT LOCATIONS AND ARRANGEMENT ARE SCHEMATIC. CONTRACTOR SHALL COORDINATE WITH EQUIPMENT MANUFACTURER FOR DETAILED CONNECTION REQUIREMENTS AND PROVIDE MATERIALS AND INSTALLATION FOR A COMPLETE AND OPERATIONAL SYSTEM.
4. PROVIDE ALL ELECTRICAL DEMOLITION REQUIRED FOR THE PROJECT. SEE DEMO NOTES SHEET E5, AND ALSO SHEETS C2.3 AND C2.4 FOR ADDITIONAL DETAIL.

KEY NOTES:

1. CONTRACTOR SHALL PROVIDE RECEPTACLES IN GENERATOR ENCLOSURE FOR BATTERY CHARGER AND HEATER. PROVIDE BRANCH CIRCUITS TO NEW LIGHTING PANEL LP1; SEE PANEL SCHEDULE.
2. GENERATOR ENCLOSURE TO INCLUDE LIMIT SWITCHES ON ALL EXTERIOR GENERATOR DOORS. WIRE LIMIT SWITCHES IN SERIES TO PROVIDE INTRUSION STATUS TO THE TELEMETRY PANEL.
3. CONTRACTOR SHALL COORDINATE NEW NATURAL GAS CONNECTION AND LP FUEL SUPPLY TO GENERATOR. PROVIDE ALL MATERIALS AND INSTALLATION FOR A REDUNDANT FUEL SYSTEM.
4. CONTRACTOR SHALL PROVIDE NEW AREA LIGHT WITH GFCI RECEPTACLE LOCATED AT THE BASE OF POLE.
5. EXISTING 100 AMP 480V THREE PHASE POWER FEED TO PUMP STATION NO.8. PROTECT DURING CONSTRUCTION, RECONNECT TO NEW MAIN DISTRIBUTION PANEL. THE CONTRACTOR SHALL PROVIDE TEMPORARY POWER TO PUMP STATION #8 DURING CONSTRUCTION.
6. HAZARDOUS LOCATIONS - FLOW METER VAULT IS CLASS I, DIV 2 PER NFPA 820, TABLE 4.2, ROW 31a. ALL INSTRUMENTATION, ELECTRICAL EQUIPMENT AND INSTALLATION SHALL BE IN ACCORDANCE WITH NEC ARTICLE 500.
7. TELECOMMUNICATIONS NOTE: CONTRACTOR SHALL PROVIDE (2) 2" SCH 40 PVC CONDUIT ('FIBER' AND 'TEL') FROM PUMP BUILDING TO NEW HANDHOLES AS INDICATED ON PLAN. CITY WILL CONTRACT WITH TELECOMM PROVIDER TO PROVIDE RACEWAY TO THIS POINT AND TO PROVIDE FIBER OPTIC CABLING AND SERVICE TO THE PUMP BUILDING. TELEPHONE SHALL BE MAINTAINED AS SPARE AND MAY BE STUBBED AND CAPPED AT EXTERIOR. CONTRACTOR TO EXTEND RACEWAY TO NEW TELECOMM AREA FOR DATA SERVICE TO TELEMETRY PANEL. CITY PROGRAMMER SHALL CONFIGURE COMMUNICATIONS TO WATER PLANT OVER FIBER OPTIC MEDIA, AND TELEMETRY RADIO AS REDUNDANT COMMUNICATIONS.

DEMOLITION WORK:

1. ALL DEMOLITION WORK REQUIRED UNDER THIS CONTRACT IS NOT SHOWN ON THE DRAWINGS.
2. THE CONTRACTOR SHALL INSPECT THE EXISTING SITES AND INSTALLATIONS PRIOR TO BIDDING AND SHALL MAKE HIS OWN JUDGMENT AS TO THE WORK REQUIRED TO PROVIDE COMPLETE DEMOLITION AS SHOWN OR WITHIN THE INTENT OF THE CONTRACT DOCUMENTS.
3. EXISTING EQUIPMENT, SYSTEMS, AND MATERIALS REMOVED DURING DEMOLITION SHALL BE MADE AVAILABLE FOR THIS INSPECTION AND DECISION AS TO WHETHER THE OWNER WILL RETAIN POSSESSION. ITEMS SELECTED FOR RETENTION SHALL BE TURNED OVER TO THE OWNER. THESE ITEMS SHALL BE DELIVERED TO A LOCATION ON THE PREMISES SELECTED BY THE OWNER. ALL MATERIAL NOT SELECTED FOR RETENTION BY THE OWNER AND DEBRIS SHALL BE LEGALLY DISPOSED OF BY THE CONTRACTOR.
4. SEE CIVIL DRAWINGS AND SPECIFICATIONS FOR ADDITIONAL DEMOLITION AND PHASING REQUIREMENTS.

DEMOLITION NOTES:

D1 PROVIDE COMPLETE ELECTRICAL DEMOLITION OF EXISTING MOTOR CONTROL CENTER INCLUDING SERVICE DISCONNECT, AUTOMATIC TRANSFER SWITCH, TRANSFORMER, PANELBOARD, MOTOR STARTERS, AND CIRCUIT BREAKER FOR THE 100A POWER FEED TO PUMP STATION NO.8.

D2 PROVIDE COMPLETE ELECTRICAL DEMOLITION OF EXISTING 150KW GENERATOR INCLUDING NATURAL GAS FUEL SUPPLY, WALL MOUNTED AIR-INTAKE LOUVER, EXHAUST FAN, AND EXTERIOR MUFFLER SYSTEM.

D3 REPLACE EXISTING UTILITY SERVICE EQUIPMENT. COORDINATE EQUIPMENT REQUIREMENTS WITH PUGET SOUND ENERGY.

D4 PROVIDE COMPLETE ELECTRICAL DEMOLITION OF TWO (2) EXISTING 15HP PUMPS.

D5 REPLACE ALL EXISTING FLUORESCENT LIGHT FIXTURES WITH LED FIXTURES.

D6 PROVIDE COMPLETE ELECTRICAL DEMOLITION OF TWO (2) EXISTING EXHAUST FANS.

D7 PROVIDE COMPLETE DEMOLITION OF EXISTING PHONE SERVICE. PATCH AND SEAL INTERIOR / EXTERIOR WALL AS REQUIRED.

D8 REMOVE EXISTING TELEMETRY EQUIPMENT LOCATED ON ROOF. PROTECT AND REINSTALL AFTER ROOF RENOVATION.

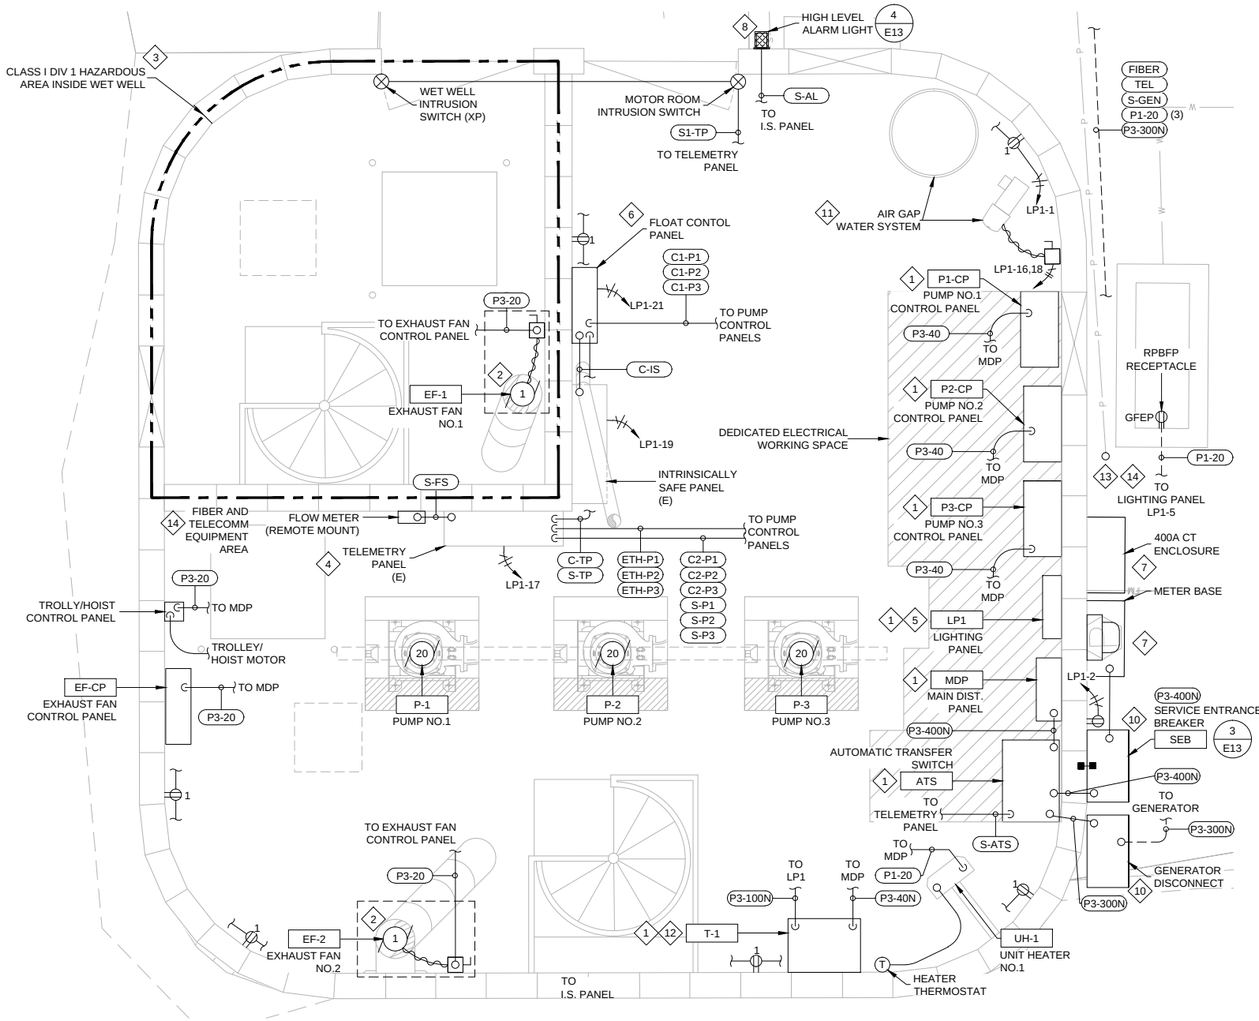
ELECTRICAL DEMOLITION PLAN

DATE	SCALE	JOB NUMBER
06/08/2016	AS SHOWN	2014-079A

SHEET E5 OF 39

KEY NOTES:

1. CONTRACTOR SHALL PROVIDE NEW ELECTRICAL PANELS AND ALL REQUIRED RACEWAY SHOWN ON DRAWINGS.
2. EXHAUST FAN MOTOR AND DISCONNECT LOCATED ON ROOF OF BUILDING, PROVIDE RACEWAY TO FAN CONTROL PANEL.
3. HAZARDOUS LOCATIONS - CLASS I, DIV 1 PER NFPA 820. ALL INSTRUMENTATION, ELECTRICAL EQUIPMENT AND INSTALLATION SHALL BE IN ACCORDANCE WITH NEC ARTICLE 500.
4. CONTRACTOR SHALL PROVIDE NEW ALLEN BRADLEY PANELVIEW 700, I/O CARDS AND INSTALLATION REQUIRED FOR A COMPLETE AND OPERATIONAL SYSTEM.
5. CONNECT NEW AND EXISTING ELECTRICAL EQUIPMENT TO NEW PANEL LP1. PROVIDE NEW RACEWAY AS REQUIRED.
6. CONTRACTOR SHALL PROVIDE NEW NEMA 12 FLOAT CONTROL PANEL.
7. DEMO EXISTING UTILITY SERVICE EQUIPMENT AND REPLACE WITH NEW CT ENCLOSURE AND METER BASE TO MEET CURRENT PSE REQUIREMENTS. COORDINATE WITH PUGET SOUND ENERGY.
8. PROVIDE VANDAL PROOF RED LED HIGH LEVEL ALARM LIGHT. WIRE TO TELEMETRY PANEL TO INDICATE HIGH LEVEL ALARM.
9. REPLACE EXISTING WET WELL LEVEL TRANSMITTER, LEVEL FLOATS AND OPERATOR IN TROUBLE PUSH BUTTONS. REPLACE EXISTING PUMP ROOM FLOOD SWITCH AND OPERATOR IN TROUBLE PUSH BUTTON.
10. ALL ELECTRICAL EQUIPMENT SHALL ALL BE INSTALLED ABOVE THE 100 YR. FLOOD LEVEL.
11. PROVIDE ELECTRICAL DISCONNECT FOR AIR GAP WATER SYSTEM. DISCONNECT PREVENTS THE WATER SYSTEM FROM RUNNING IN AUTO WHEN POWER IS OFF.
12. CONTRACTOR SHALL PROVIDE EQUIPMENT REQUIRED TO WALL MOUNT ELECTRICAL TRANSFORMER T-1 ABOVE THE 100 YR. FLOOD LEVEL.
13. INTERCEPT AND EXTEND PS#8 FEEDER TO NEW 480V DISTRIBUTION PANEL. PROVIDE JUNCTION BOX FOR SPLICING OF NEW TO EXISTING CONDUCTORS.
14. TELECOMMUNICATIONS NOTE: CONTRACTOR SHALL PROVIDE (2) 2" SCH 40 PVC CONDUIT ('FIBER' AND 'TEL') FROM PUMP BUILDING TO NEW HANDHOLES AS INDICATED ON PLAN. CITY WILL CONTRACT WITH TELECOMM PROVIDER TO PROVIDE RACEWAY TO THIS POINT AND TO PROVIDE FIBER OPTIC CABLING AND SERVICE TO THE PUMP BUILDING. TELEPHONE SHALL BE MAINTAINED AS SPARE AND MAY BE STUBBED AND CAPPED AT EXTERIOR. CONTRACTOR TO EXTEND RACEWAY TO NEW TELECOMM AREA FOR DATA SERVICE TO TELEMETRY PANEL, AND REINSTALL TELEMETRY ANTENNA ON RENOVATED ROOF. CITY PROGRAMMER SHALL CONFIGURE COMMUNICATIONS TO WATER PLANT OVER FIBER OPTIC MEDIA, AND TELEMETRY RADIO AS REDUNDANT COMMUNICATIONS.



MOTOR ROOM FLOOR - POWER & CONTROLS PLAN

SCALE: 1" = 2'

SCALE HORIZONTAL SCALE 2 0 2 4 FEET

GENERAL NOTES:

1. ALL CONDUIT ROUTING IS NOT SHOWN. ELECTRICAL CONTRACTOR SHALL DETERMINE THE BEST ROUTING PATH AND CIRCUIT COMBINATIONS BASED ON FIELD CONDITIONS AND ELECTRICAL CODES.
2. CONDUCTOR AND CONDUIT SIZING SHALL BE AS REQUIRED BY NEC.
3. EQUIPMENT LOCATIONS AND ARRANGEMENT ARE SCHEMATIC. CONTRACTOR SHALL COORDINATE WITH EQUIPMENT MANUFACTURER FOR DETAILED CONNECTION REQUIREMENTS AND PROVIDE MATERIALS AND INSTALLATION FOR A COMPLETE AND OPERATIONAL SYSTEM.
4. REPLACE ALL EXISTING RECEPTACLES WITH NEW GFCI WITH WET LOCATION COVERS. PROVIDE STAINLESS STEEL COVER PLATES FOR ALL SPARE JUNCTION BOXES IN EXISTING WALLS.

SHEET E6 OF 39

GENERAL LIGHTING NOTES:

1. DEMO ALL EXISTING LIGHTING AND REPLACE WITH NEW FIXTURES PER LIGHTING SCHEDULE. COORDINATE ALL FINAL FIXTURE LOCATIONS WITH MECHANICAL TO AVOID CONFLICTS.
2. LIGHTING CIRCUITS SHALL BE #12 AWG COPPER. ROUTING SHOWN ON PLANS IS SCHEMATIC. ROUTE ALL LIGHTING CIRCUITS TO LIGHTING PANEL, SEE SCHEDULES. ELECTRICAL CONTRACTOR SHALL DETERMINE THE BEST ROUTING PATH AND CIRCUIT COMBINATIONS BASED ON FIELD CONDITIONS AND ELECTRICAL CODES.
3. PROVIDE UNSWITCHED POWER CIRCUIT TO ALL EMERGENCY FIXTURES. CONTRACTOR MAY USE EXISTING RECESSED JBOXES AND RACEWAY WHERE IN SUITABLE CONDITION. REPLACE WHERE NECESSARY. PROVIDE STAINLESS STEEL COVER ON ALL SPARE RECESSED JBOXES.

KEY NOTES:

1. PROVIDE LIGHT FIXTURE WITH EMERGENCY BATTERY PACK WHERE INDICATED.
2. HAZARDOUS LOCATIONS - CLASS I, DIV 1 PER NFPA 820. ALL INSTRUMENTATION, ELECTRICAL EQUIPMENT AND INSTALLATION SHALL BE IN ACCORDANCE WITH NEC ARTICLE 500.

NOTES:
1. FEEDER ID FOLLOWED BY THE SUFFIX "N" INDICATES NEUTRAL CONDUCTOR. PROVIDE ADDITIONAL NEUTRAL CONDUCTOR SIZED TO MATCH PHASE CONDUCTORS.
2. CONDUCTOR AMPACITY BASED ON NEC TABLE 310.16.
3. CONDUIT FILL BASED ON NEC ANNEX C, TABLE C.1 FOR THHN TYPE CONDUCTORS. CONTRACTOR SHALL PROVIDE ADJUSTMENTS AS NECESSARY FOR OTHER CONDUCTOR TYPES.
4. CONTRACTOR MAY COMBINE BRANCH CIRCUITS IN COMMON RACEWAY UP TO SIX CURRENT CARRYING CONDUCTORS. ADJUSTMENT FACTORS SHALL BE APPLIED PER NEC TABLE 310.15(B)(2)(a).
5. MINIMUM CONDUIT SIZE FOR UNDERGROUND RACEWAY IS 1 INCH.

SECONDARY AND FEEDER RACEWAY
SCALE: NONE

GENERAL NOTES:

1. MAINTAIN 12" MIN. SEPARATION BETWEEN WATER UTILITIES.
2. PROVIDE 2" SEPARATION BETWEEN MULTIPLE CONDUITS AND NEAREST SIDEWALL.
3. TRENCH WIDTH TO ACCOMMODATE ALL CONDUITS AND SERVICES. MINIMUM WIDTH 18".
4. BACKFILL IN ACCORDANCE WITH UTILITY AND CIVIL STANDARDS.
5. CONDUIT SHALL BE BEDDED W/SAND (3" BASE & 3" COVER MIN).

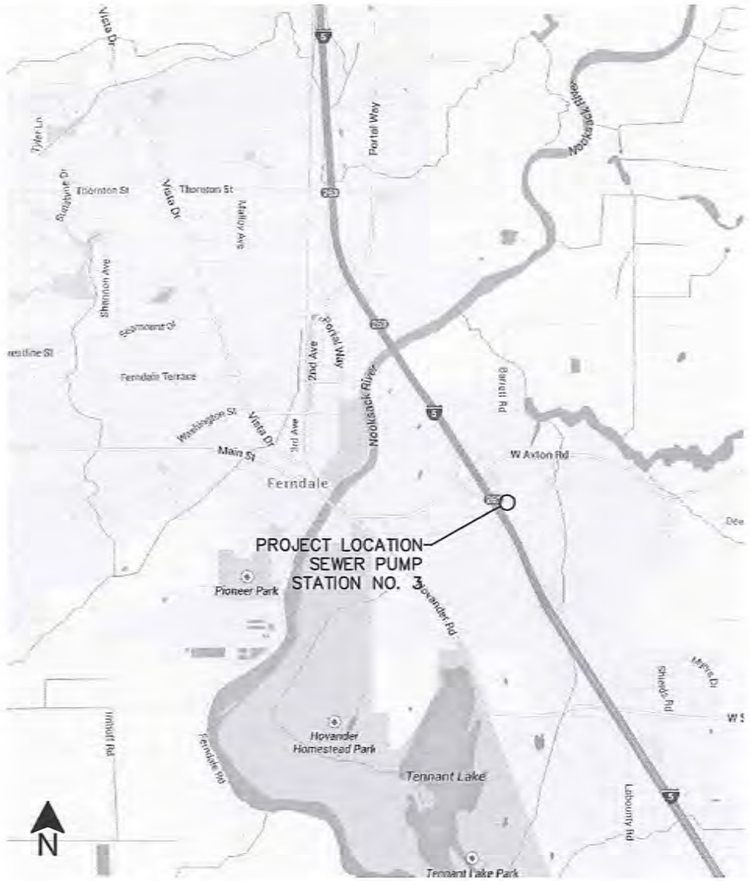
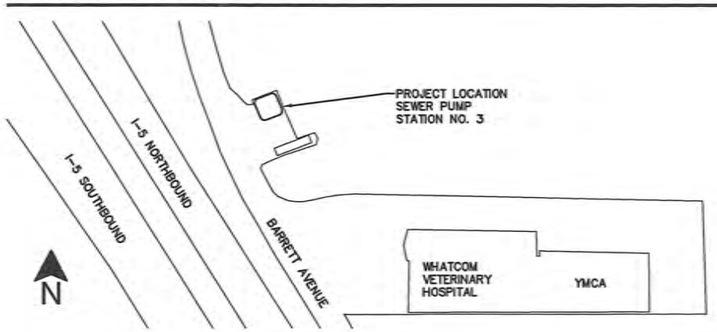
PUMP STATION NO.3 UPGRADE – CITY PROJECT No. SS2014-02

NO.	REVISIONS	BY	DATE

VICINITY MAP - NOT TO SCALE



LOCATION MAP - NOT TO SCALE



GENERAL NOTES

1. ALL WORKMANSHIP AND MATERIALS SHALL BE IN ACCORDANCE WITH CITY OF FERNDALE STANDARDS AND THE MOST CURRENT COPY OF THE STATE OF WASHINGTON STANDARD SPECIFICATIONS FOR ROAD, BRIDGE AND MUNICIPAL CONSTRUCTION (WSDOT/APWA).
2. ALL APPROVALS AND PERMITS REQUIRED BY THE CITY OF FERNDALE SHALL BE OBTAINED PRIOR TO THE START OF CONSTRUCTION.
3. THE CONTRACTOR SHALL BE FULLY RESPONSIBLE FOR THE LOCATION AND PROTECTION OF ALL EXISTING UTILITIES. THE CONTRACTOR SHALL VERIFY ALL UTILITY LOCATIONS PRIOR TO CONSTRUCTION BY CALLING THE UNDERGROUND LOCATE LINE AT 1-800-332-2344 A MINIMUM OF 2 BUSINESS DAYS PRIOR TO ANY EXCAVATION.
4. ALL NEW PLASTIC PIPE AND SERVICES SHALL BE INSTALLED WITH CONTINUOUS TRACER TAPE INSTALLED 12" TO 18" UNDER THE PROPOSED FINISHED SUBGRADE. THE MARKER SHALL BE PLASTIC NON-BIODEGRADABLE, METAL CORE OR BACKING MARKED WATER WHICH CAN BE DETECTED BY A STANDARD METAL DETECTOR.
5. EROSION CONTROL MEASURES SHALL BE TAKEN BY THE CONTRACTOR DURING CONSTRUCTION TO PREVENT SILTATION TO EXISTING STORM DRAINAGE FACILITIES AND ROADWAYS.
6. IT SHALL BE THE RESPONSIBILITY OF THE CONTRACTOR TO HAVE A COPY OF THESE APPROVED PLANS ON CONSTRUCTION SITE AT ALL TIMES.
7. ANY CHANGES TO THE DESIGN SHALL FIRST BE REVIEWED AND APPROVED BY THE PROJECT ENGINEER.
8. ALL LINES SHALL BE CLEANED AND PRESSURE TESTED PRIOR TO PAVING IN CONFORMANCE WITH THE ABOVE REFERENCED SPECIFICATIONS. TESTING SHALL TAKE PLACE AFTER ALL UNDERGROUND UTILITIES ARE INSTALLED AND COMPACTION OF THE ROADWAY SUBGRADE IS COMPLETED.
9. PRIOR TO BACKFILL ALL MAINS AND APPURTENANCES SHALL BE INSPECTED AND APPROVED BY THE CITY OF FERNDALE CONSTRUCTION INSPECTOR. APPROVAL SHALL NOT RELIEVE THE CONTRACTOR FOR CORRECTION OF ANY DEFICIENCIES AND/OR FAILURES AS DETERMINED BY SUBSEQUENT TESTING AND INSPECTIONS. IT SHALL BE THE CONTRACTOR'S RESPONSIBILITY TO NOTIFY THE INSPECTOR FOR THE REQUIRED INSPECTIONS.
10. ALL WORK AND MATERIALS SHALL BE GUARANTEED BY THE CONTRACTOR FOR ONE YEAR AFTER FINAL ACCEPTANCE.
11. THE LOCATIONS OF ALL EXISTING UTILITIES SHOWN ON THE PLANS ARE APPROXIMATE AND NOT ALL ARE SHOWN. THE CONTRACTOR IS RESPONSIBLE TO VERIFY AND PROTECT ALL UTILITIES.
12. ALL RESTORATION AND LANDSCAPING WITHIN PUBLIC OR PRIVATE PROPERTY SHALL OCCUR WITHIN THREE WEEKS OF DISTURBANCE. THIS SHALL INCLUDE, BUT NOT BE LIMITED TO, ALL LAWNS, LANDSCAPING, FENCES, GRAVEL, ASPHALT AND CONCRETE.
13. THE CONTRACTOR SHALL KEEP A RECORD OF AS-BUILT INFORMATION THROUGHOUT THE ENTIRE PROJECT. THIS INFORMATION SHALL INCLUDE ALL DEVIATIONS FROM THE PLANS AND ANY OTHER PERTINENT INFORMATION NOT SHOWN ON THE PLANS BUT DISCOVERED DURING CONSTRUCTION
14. THE CONTRACTOR SHALL REPLACE ALL MONUMENTS, RIGHT-OF-WAY MARKERS, PROPERTY STAKES, ETC. THAT ARE DISTURBED DURING CONSTRUCTION. THE CONTRACTOR SHALL USE A SURVEYOR REGISTERED IN THE STATE OF WASHINGTON TO COMPLETE ALL SURVEY WORK.

EROSION AND SEDIMENTATION CONTROL

1. IT IS THE CONTRACTOR'S RESPONSIBILITY TO PREVENT POLLUTION AND EROSION IN ACCORDANCE WITH WSDOT SECTION 1.07.15. EROSION CONTROL BEST MANAGEMENT PRACTICES SHALL CONFORM TO THE CURRENT WASHINGTON DEPARTMENT OF ECOLOGY STORMWATER MANAGEMENT MANUAL FOR THE PUGET SOUND BASIN.

EXISTING UTILITIES

1. CONTRACTOR IS ADVISED THAT UNDERGROUND WATER, SEWER, STORM, TELEPHONE, FIBER OPTIC, AND GAS MAY BE LOCATED IN THE VICINITY OF THIS PROJECT. NO ATTEMPT WAS MADE TO SHOW ALL UTILITIES ON THE PLAN. LOCATIONS SHOWN FOR EXISTING UTILITIES ARE APPROXIMATE. OTHER UTILITIES MAY EXIST WHICH ARE NOT SHOWN ON THE PLANS. PRIOR TO COMMENCING ANY UNDERGROUND WORK, THE CONTRACTOR SHALL POTHOLE ALL UTILITIES AT ALL PROPOSED CROSSING AND CONNECTION POINTS TO CONFIRM THEIR DEPTHS AND PLAN LOCATIONS.
2. IT SHALL BE THE RESPONSIBILITY OF THE CONTRACTOR TO DETERMINE THE TRUE AND CORRECT LOCATIONS OF EXISTING UTILITIES THAT MAY IMPACT THE WORK. CONTRACTOR SHALL NOTIFY ENGINEER PRIOR TO COMMENCING CONSTRUCTION IF MARKED UTILITIES APPEAR TO CONFLICT WITH PROPOSED IMPROVEMENTS. THE COST OF LOCATING, PROTECTING AND ACCOMMODATING EXISTING UTILITIES SHALL BE INCIDENTAL TO THE COST OF THE PROJECT. IF AN ACTUAL CONFLICT REQUIRES RELOCATION OF AN EXISTING UTILITY OR THE REDESIGN OF THE PROPOSED IMPROVEMENT, THE ENGINEER WILL DETERMINE IF EXTRA PAY IS WARRANTED TO ACCOMMODATE THE CHANGED OR UNFORESEEN CONDITION. MINOR HORIZONTAL OR VERTICAL ADJUSTMENTS OF THE PROPOSED IMPROVEMENTS TO AVOID CONFLICTS SHALL NOT ENTITLE THE CONTRACTOR TO EXTRA PAY.

TRAFFIC CONTROL

1. THE CONTRACTOR IS NOT ALLOWED TO COMPLETELY CLOSE ANY STREET TO TRAFFIC. THE CONTRACTOR SHALL MAINTAIN ONE OPEN LANE EACH WAY FOR THE DURATION OF THE PROJECT.

PUMP STATION #3 – EXISTING SITE PLAN

SURVEYOR'S CERTIFICATE

I HEREBY CERTIFY THAT I AM A LICENSED LAND SURVEYOR IN THE STATE OF WASHINGTON, THAT THIS MAP IS BASED ON AN ACTUAL FIELD SURVEY DONE BY ME OR UNDER MY DIRECT SUPERVISION AND THAT ALL DATA SHOWN HEREON ACTUALLY EXISTS IN THE LOCATIONS SHOWN AT THE TIME OF THIS SURVEY. THIS TOPOGRAPHIC MAP WAS DONE AT THE REQUEST OF THE CITY OF FERNDALE IN JULY OF 2014.

J. THOMAS BREWSTER, P.L.S. NO. 44335 DATE 6/7/2016

J. THOMAS BREWSTER STATE OF WASHINGTON 44335 REGISTERED PROFESSIONAL LAND SURVEYOR 6/7/2016

CONTROL NOTES

1. BASIS OF COORDINATES: COORDINATES POSITIONS SHOWN ARE ***NAD83/91 WASHINGTON STATE PLANE (NORTH ZONE) COORDINATES***, BASED UPON THE PUBLISHED VALUES FOR THE CITY OF FERNDALE'S 2001 HORIZONTAL AND VERTICAL CONTROL NETWORK. COORDINATION FOR GROUND-VALUE MENSURATION BASED UPON HOLDING THE FOLLOWING PUBLISHED COORDINATES FOR ***CITY OF FERNDALE SURVEY MONUMENT #08,*** A SURFACE MONUMENT IN CONCRETE AT THE SOUTH AND EAST SIDE OF THE SIDEWALK AT FERNDALE CITY COUNCIL CHAMBERS AS FOLLOWS:

NORTHING = 678,623.10 USFT
EASTING = 1,217,288.97 USFT

2. BASIS OF BEARINGS: HELD BEARING BETWEEN ABOVE MENTIONED ***CITY OF FERNDALE SURVEY MONUMENT #08*** (BOC) AND FOUND SURFACE MONUMENT IN CONCRETE AT AT THE NORTH SIDE OF AXTON ROAD , SAID MONUMENT BEING ***CITY OF FERNDALE CONTROL MONUMENT #09***, PER THE AFOREMENTIONED 2001 CONTROL NETWORK. THE GPS-DERIVED INVERSE BEARING BETWEEN #08 AND #09 BEING ***N 89° 22' 58" E*** A DISTANCE OF ***9321.70 FEET***. NAD83/91 COORDINATES FOR #09 ARE AS FOLLOWS:

NORTHING = 678,723.53 USFT
EASTING = 1,226,610.13 USFT

3. BASIS OF ELEVATIONS: ELEVATIONS ARE ***NGVD29*** VALUES BASED UPON HOLDING THE PUBLISHED ELEVATION OF ***31.27'*** AT THE MONUMENT DESIGNATED CITY OF ***FERNDALE #12***, A SURFACE MONUMENT IN THE NORTHWEST QUADRANT OF THE INTERSECTION OF SMITH ROAD AND LABOUNTY DRIVE, PER THE PUBLISHED DATA SHEET. ELEVATIONS AT THE WILSON SITE CONTROL POINTS WERE ESTABLISHED BY CLOSED DIGITAL LEVEL LOOP.

SURVEY NOTES

1. THIS TOPOGRAPHIC SURVEY WAS PERFORMED IN JULY AND AUGUST, 2014. ALTHOUGH THERE IS A BOUNDARY COMPONENT TO THIS SURVEY, NO MONUMENTS WERE SET DURING THE COURSE OF THIS SURVEY PURPORTING TO REPRESENT THE BOUNDARIES HEREON SHOWN. THIS TOPOGRAPHIC SURVEY WAS PREPARED TO SUPPORT THE DESIGN OF PUMP STATION UPGRADES.
2. ANGULAR AND LINEAR MEASUREMENTS WERE COLLECTED USING A COMBINATION OF GPS AND CONVENTIONAL METHODOLOGIES. PRIMARY CONTROL WAS COLLECTED USING TRIMBLE 5700 SURVEY-GRADE GPS RECEIVERS OPERATING IN NETWORKED RTK MODE. FROM GPS CONTROL, A TRIMBLE S-6 ROBOTIC TOTAL STATION WAS USED TO TIE SECONDARY CONTROL POINTS AND COLLECT TOPOGRAPHIC DATA.
3. LOCATIONS OF UNDERGROUND UTILITIES DEPICTED HEREON ARE ACCORDING TO SURFACE MARKS PROVIDED BY OTHERS, AND WILSON CAN NOT AND WILL NOT GUARANTEE THE CORRESPONDENCE BETWEEN THE MARKS AND THE EXTANT UTILITIES. UTILITIES MAY EXIST THAT WERE NOT MARKED AT THE TIME OF THIS SURVEY.
4. THIS SURVEY WAS PERFORMED WITHOUT THE BENEFIT OF A CURRENT TITLE REPORT, AND THE EXISTENCE OF EASEMENTS OF RECORD THAT MAY AFFECT THE PROPERTY'S USE WAS NOT INVESTIGATED IN THE COURSE OF THIS SURVEY.

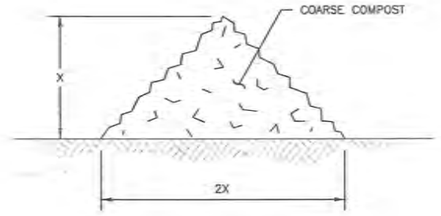
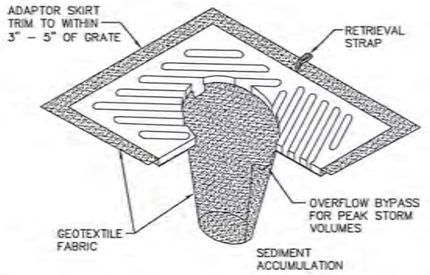
PUMP STATION #3 – TESC PLAN



X = 1.0' FOR SLOPES 4H:1V OR FLATTER
X = 1.5' FOR SLOPES STEEPER THAN 4H:1V

COMPOST BERM
NOT TO SCALE



NOTES:

1. INSERT SHALL BE INSTALLED PRIOR TO CLEARING AND GRADING ACTIVITY, OR UPON PLACEMENT OF A NEW CATCH BASIN.
2. SEDIMENT SHALL BE REMOVED FROM THE UNIT WHEN IT BECOMES HALF FULL .
3. SEDIMENT REMOVAL SHALL BE ACCOMPLISHED BY REMOVING THE INSERT, EMPTYING, AND RE-INSERTING IT INTO THE CATCH BASIN.

BMP C-220
CATCH BASIN INSERT
NOT TO SCALE

BMP C233 – SILT (FILTER FABRIC) FENCE

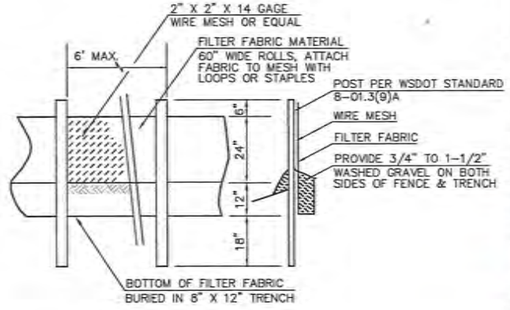
PURPOSE: USE OF A SILT FENCE REDUCES THE TRANSPORT OF COARSE SEDIMENT FROM A CONSTRUCTION SITE BY PROVIDING A TEMPORARY PHYSICAL BARRIER TO SEDIMENT AND REDUCING THE RUNOFF VELOCITIES OF OVERLAND FLOW.

INSTALLATION: USE DOWN SLOPE OF DISTURBED AREAS AS SHOWN ON THE PLAN AND AS NEEDED TO RESPOND TO SITE SPECIFIC CONDITIONS. GEOTEXTILE SHALL MEET THE FOLLOWING STANDARDS: POLYMETRIC MESH AOS (ASTM D4751) = 0.60 MM MAXIMUM FOR SLIT FILM WOVENS, 0.30 MM MAXIMUM FOR ALL OTHER GEOTEXTILES TYPES, AND 0.15 MM FOR ALL FABRIC TYPES, WATER PERMITTIVITY (ASTM D4491) = 0.2 SEC(-1) MINIMUM, GRAB TENSILE STRENGTH (ASTM D4632) = 180 POUNDS MINIMUM FOR EXTRA STRENGTH FABRIC, 100 POUNDS MINIMUM FOR STANDARD STRENGTH FABRIC, GRAB TENSILE ELONGATION (ASTM D4632) = 30% MAXIMUM, ULTRAVIOLET RESISTANCE (ASTM D4355) = 70% MINIMUM.

STANDARD STRENGTH FABRICS SHALL BE SUPPORTED WITH WIRE MESH, CHICKEN WIRE, 2-INCH X 2-INCH WIRE, SAFETY FENCE, OR JUTE MESH TO INCREASE THE STRENGTH OF THE FABRIC. SILT FENCE MATERIALS ARE AVAILABLE THAT HAVE SYNTHETIC MESH BACKING ATTACHED.

THE MINIMUM HEIGHT OF THE TOP OF THE SILT FENCE SHALL BE 2 FEET AND THE MAXIMUM HEIGHT SHALL BE 2.5 FEET.

MAINTENANCE: INSPECT THE FENCE AFTER RAINFALL EVENTS FOR SEDIMENT DEPOSITS UPSTREAM OF THE FENCE. REMOVE SEDIMENT DEPOSITS WHEN THEY REACH A DEPTH OF APPROXIMATELY 8 INCHES DEEP. REPLACE FILTER FABRIC FENCES DAMAGED BY CONSTRUCTION EQUIPMENT OR ULTRAVIOLET BREAKDOWN.



BMP C-233
SILT FENCE
NOT TO SCALE

PROJECT WIDE BMPS

THE FOLLOWING BMPS SHALL BE IMPLEMENTED THROUGHOUT THE ENTIRE PROJECT TO THE MAXIMUM EXTENT POSSIBLE:

BMP C101 PRESERVING NATURAL VEGETATION. CONTRACTOR SHALL CLEAR AND DISTURB ONLY AREAS REQUIRED TO CONSTRUCT IMPROVEMENTS AND SHALL DILIGENTLY MINIMIZE DISTURBED AREA.

BMP C102 BUFFER ZONES. CONTRACTOR SHALL MARK CLEARING LIMITS AND KEEP ALL EQUIPMENT AND CONSTRUCTION DEBRIS OUT OF NATURAL AREAS.

BMP C120 PERMANENT SEEDING & PLANTING. CONTRACTOR SHALL COMPLETE REQUIRED LANDSCAPING AS RAPIDLY AS POSSIBLE. ALL OTHER DISTURBED AREAS OUTSIDE OF PAVED AREAS SHALL BE HYDROSEEDED AS RAPIDLY AS POSSIBLE WITH SUITABLE SEED-MULCH-FERTILIZER MIX FOR LOCAL CLIMATE.

BMP C121 MULCHING . CONTRACTOR SHALL MULCH ALL LANDSCAPED AREAS AS RAPIDLY AS POSSIBLE.

BMP C130 SURFACE ROUGHENING. CONTRACTOR SHALL ROUGHEN DISTURBED AREAS PRIOR TO PERMANENT SEEDING AND PLANTING.

BMP C140 DUST CONTROL. CONTRACTOR SHALL KEEP DUST FROM CONSTRUCTION ACTIVITIES AND EXPOSED SOILS TO A MINIMUM.

BMP C160 CERTIFIED EROSION CONTROL LEAD (MUST BE EMPLOYED BY GENERAL CONTRACTOR AND ON SITE DURING CONSTRUCTION.)

BMP C220 CATCH BASIN INSERT. CONTRACTOR SHALL INSTALL CATCH BASIN INSERTS AS NEEDED.

AREA SPECIFIC BMPs

THE FOLLOWING BMPs SHALL BE USED IN LOCATIONS IDENTIFIED ON THE SITE PLAN:

BMP C233 SILT FENCE. CONTRACTOR SHALL INSTALL SILT FENCE AT LOCATIONS NOTED ON PLANS.

COMPOST BERM. CONTRACTOR SHALL INSTALL COMPOST BERM AT LOCATIONS NOTED ON PLANS.

W:\2014\2014-079 - COF Pump Stations 2&3 Upgrades\Dwg\PS3 dwg\C2.1 TESC.dwg, 6/7/2016 1:24:16 PM, ACADPLOT 11X17.INKCBENEDICT.pc3, RDN

TEMPORARY EROSION & SEDIMENTATION NARRATIVE

T.E.S.C. NARRATIVE –
(ORGANIZED PER DOE's BASIC ELEMENTS #1–12)

ELEMENT #1: MARK CLEARING LIMITS
Prior to beginning land disturbing activities, including clearing and grading, all clearing limits, sensitive areas and their buffers, and trees that are to be preserved within the construction area should be clearly marked, both in the field and on the plans, to prevent damage and offsite impacts. Plastic, metal, or stake wire fence may be used to mark the clearing limits.

ELEMENT #2: ESTABLISH CONSTRUCTION ACCESS
Construction vehicle access and exit will occur via the existing access off Pacific Highway. Access/egress will be limited to this one location. The access point shall be stabilized near the project site using track–clean plates to minimize the tracking of sediment into the parking lot or onto public roads. In place of track clean plates, contractor shall provide adequate provisions to ensure that no sediment is tracked off the construction site. In the event that sediment tracking occurs, contractor shall remove all tracked sediment immediately.

Wheel wash or tire baths, if required, shall be located on–site.

The parking lot access point will be cleaned thoroughly at the end of each day, or more frequently during wet weather, if necessary. Sediment shall be removed from roads by shoveling or pickup sweeping and shall be transported to a controlled sediment disposal area. Street washing will be allowed only after sediment is removed in this manner.

ELEMENT #3: CONTROL FLOW RATES
Properties and waterways downstream from this project shall be protected from erosion due to increases in the volume, velocity, and peak flow rate of stormwater runoff from the project site. Flow controls shall be implemented as early in the project construction phase as is practicable to mitigate flow rates.

The Ecology Manual requires a downstream analysis if changes in flows could impair or alter conveyance systems, stream banks, bed sediment or aquatic habitat. Since the proposed construction site is predominantly flat, and compost berms will be installed during construction, increased downstream flow rates are not anticipated during construction. No runoff will discharge directly from the site.

ELEMENT #4: INSTALL SEDIMENT CONTROLS
To the maximum extent possible, the duff layer, native topsoil, and natural vegetation shall be retained in an undisturbed state.

Prior to leaving the construction site, stormwater runoff from disturbed areas shall pass through a sediment pond or other appropriate sediment removal BMP. Runoff from fully stabilized areas may be discharged without a sediment removal BMP, but must meet the flow control performance standard of Element #3. Full stabilization means concrete or asphalt paving; quarry spalls used as ditch lining; or the use of rolled erosion products, a bonded fiber matrix product, or vegetative cover in a manner that will fully prevent soil erosion. Sediment ponds, vegetated buffer strips, sediment barriers or filters, dikes, and other BMPs intended to trap sediment on–site shall be constructed as one of the first steps in grading. These BMPs shall be functional before other land disturbing activities take place.

Earthen structures such as dams, dikes, and diversions shall be seeded and mulched according to the timing indicated in Element #5.

As a part of this project BMPs intended to trap sediment on site shall be implemented as one of the first steps in construction. Runoff will not discharge directly from the site.

ELEMENT #5: STABILIZE SOILS
The majority of the site is flat. During construction, all exposed and unworked soils shall be stabilized by application of effective BMPs that protect the soil from the erosive forces of raindrop impact and flowing water, and wind erosion.

From October 1 through April 30 of each year, no soils shall remain exposed and unworked for more than 2 days. From May 1 to September 30 of each year, no soils shall remain exposed and unworked for more than 7 days. This condition applies to all soils on site, whether at final grade or not.

Applicable practices include, but are not limited to, temporary and permanent seeding, sodding, mulching, plastic covering, soil application of polyacrylamide (PAM), early application of gravel base on areas to be paved, and dust control.

Soil stabilization measures selected shall be appropriate for the time of year, site conditions, estimated duration of use, and potential water quality impacts that stabilization agents may have on downstream waters or ground water.

Soil stockpiles must be stabilized and protected with sediment trapping measures.

Work on trenching for utilities shall not exceed the capability of the individual contractor for his portion of the project to install the bedding materials, utilities, backfill, and to re–stabilize the disturbed soils, meeting the timing condition listed above.

At the discretion of the Owner, those sites unable to maintain the quality of their stormwater discharge may be required to provide soil stabilization to all exposed soil areas regardless of the working status of the area. Upon written notification, the Contractor shall provide full stabilization of all exposed soil areas within 24 hours.

During construction, BMPs will be followed to ensure that exposed soils are protected and stabilized. Stockpiles shall be covered and exposed soils shall be covered with straw, mulch or other acceptable methods. Construction shall take place during the summer months, and dust control measures will be practiced. After construction, exposed, unpaved surfaces disturbed by construction activities will be hydro–seeded or mulched.

ELEMENT #6: PROTECT SLOPES
The majority of the site is flat and stable.
Cut and fill slopes shall be designed and constructed in a manner that will minimize erosion. The erosion control design shall take into account the site's soil type and its potential for erosion. Runoff velocities shall be reduced by minimizing the continuous length of slope with terracing and diversions, by reducing slope steepness, and by roughening slope surface.

Upslope drainage and run–on waters from off–site shall be diverted with interceptors at the top of slope. Off–site stormwater shall be handled separately from stormwater generated on the site. Diversion of off–site stormwater around the site may be a viable option. Any diverted flows shall be redirected to the natural drainage location at or before the property boundary.

Drainage shall be provided to remove ground water intersecting the slope surface of exposed soil areas.

Excavated material shall be placed on the uphill side of trenches, consistent with safety and space considerations. Check dams shall be placed at regular intervals within trenches that are cut down a slope.

ELEMENT #7: PROTECT DRAIN INLETS
All existing storm drain inlets and those made operable during construction shall be protected so that stormwater runoff does not enter the conveyance system without first being filtered or treated to remove sediment.

All approach roads shall be kept clean, and all sediment and street wash water shall not be allowed to enter storm drains without prior and adequate treatment unless treatment is provided before the storm drain discharges to water of the State.

ELEMENT #8: STABILIZE CHANNELS AND OUTLETS
All temporary on–site conveyance channels shall be designed, constructed and stabilized to prevent erosion from the expected velocity of flow from a 2 year, 24–hour frequency storm for the developed condition.

Stabilization, including armoring material, adequate to prevent erosion of outlets, adjacent stream banks, slopes and downstream reaches shall be provided at the outlets of all conveyance systems.

ELEMENT #9: CONTROL POLLUTANTS
All pollutants, including waste materials and demolition debris, that occur onsite will be handled and disposed of in a manner that does not cause contamination of stormwater.

Cover, containment, and protection from vandalism shall be provided for all chemicals, liquid products, petroleum products, and non–inert wastes present on the site. On–site fueling tanks shall include secondary containment.

On–site maintenance and repair of heavy equipment and vehicles involving oil changes, hydraulic system drain down, solvent and de–greasing cleaning operations, fuel tank drain down and removal, and other activities which may result in discharge or spillage of pollutants to the ground or into stormwater runoff must be conducted using spill prevention measures, such as drip pans. Contaminated surfaces shall be cleaned immediately following any discharge or spill incident. Emergency repairs may be performed on–site using temporary plastic placed beneath and, if raining, over the vehicle.

Wheel wash, or tire bath wastewater, shall be discharged to a separate on–site treatment system or to the sanitary sewer.

Concrete work that has not cured will be covered during rainfall to prevent increased stormwater pH as necessary to prevent violations of water quality standards. Management of pH–modifying sources shall prevent contamination of runoff and stormwater collected on the site. These sources include, but are not limited to, bulk cement, new concrete washing and curing waters, waste streams generated from concrete grinding and sawing, exposed aggregate processes, and concrete pumping and mixer washout waters.

Application of agricultural chemicals, including fertilizers and pesticides is not anticipated under this contract. If agricultural chemicals are to be used, their application shall be conducted in a manner and at application rates that will not result in loss of chemical to stormwater runoff. Manufacturers' recommendations shall be followed for application rates and procedures.

ELEMENT #10: CONTROL DE–WATERING
The following options will be implemented for dewatering as necessary.

Clean, non–turbid de–watering water, such as well–point ground water, will be discharged in a dispersed manner to thick natural vegetation near the site. This vegetated discharge location will be well away from surface waters, wetlands, or lagoon berms on site. This dewatering flow must not cause erosion or flooding of the receiving waters, and these clean waters shall not be routed through sediment ponds with stormwater.

Turbid dewatering water will be discharged to a settling tank or filter prior to being discharged to as described above for clean water.

Final discharge point must be coordinated with the Owner and Engineer.

ELEMENT #11: MAINTAIN BMPs
All temporary and permanent erosion and sediment control BMPs will be maintained and repaired as needed to assure continued performance of their intended function. Maintenance and repair shall be conducted in accordance with BMP specifications.

Sediment control BMPs shall be inspected weekly of after a runoff–producing storm event during the dry season and daily during the wet season. Because this project disturbs less than one acre of area, a certified erosion control lead need not be designated for the site. The contractor shall be responsible for all required inspection, maintenance, and repair of site BMPs.

All temporary erosion and sediment control BMPs shall be removed within 30 days after final site stabilization is achieved or after the temporary BMPs are no longer needed. Trapped sediment shall be removed.

ELEMENT #12: MANAGE THE PROJECT
The construction contractor is responsible for providing and maintaining these and such additional BMPs, as may be required to prevent erosion, control sediment, and prevent water pollution.

The contractor will be required, where feasible, to phase the project in order to prevent, to the maximum extent practicable, the transport of sediment from the development site during construction. Revegetation of exposed areas and maintenance of that vegetation shall be an integral part of the clearing activities for any phase.

When establishing the permitted clearing and grading areas, consideration will be given to minimizing removal of existing trees and minimizing disturbance/compaction of native soils except as needed for building purposes. Permitted clearing and grading areas and any other areas required to preserve critical or sensitive areas, buffers, native growth protection easements, or tree retention areas, will be delineated on the site plans and the development site.

The Owner and Engineer have evaluated, with input from utilities and other contractors, the stormwater management requirements for the entire project, including the utilities, when preparing the Construction TESC.

9. = NEW STANDBY GENERATOR. REFERENCE ELECTRICAL PLANS FOR DETAILS.
10. = NEW EQUIPMENT PAD FOR GENERATOR PER DETAIL (5/S1.1)
11. = NEW 500-GALLON PROPANE TANK. REFERENCE STRUCTURAL DRAWINGS FOR EQUIPMENT SLAB DETAILS. THE CONTRACTOR TO COORDINATE WITH THE PROPANE SUPPLIER TO RENT AND INSTALL THE TANK. ALL COSTS ASSOCIATED WITH COORDINATING THIS WORK (EXCLUDING RENTAL) SHALL BE CONSIDERED INCIDENTAL TO THE CONTRACT.
12. = NEW BOLLARD PER DETAIL (2/C4.2)
13. = EXISTING WALL-MOUNTED LIGHT TO BE REPLACED. REFERENCE ELECTRICAL PLANS FOR DETAILS.
14. = NEW 12-INCH SEWER FORCE MAIN.
15. = NEW FLOWMETER VAULT PER DETAIL (1/C4.3)
16. = NEW BYPASS SNORKEL VAULT PER DETAIL (3/C4.3)
17. = NEW BURIED 12-INCH GATE VALVE PER DETAIL (4/C4.2)
18. = EXISTING ASPHALT UNDER SHIPPING CONTAINER TO REMAIN.
19. = MATE NEW ASPHALT TO EXISTING ASPHALT AT SAWCUT LINE.
20. = EXISTING 12-INCH STORM CULVERT TO BE CLEANED AND PROTECTED DURING CONSTRUCTION.
21. = RIP RAP CULVERT ENDS PER DETAIL (6/C4.1)
22. = RESERVED.
23. = NEW 1" DIA. WATER SERVICE AND METER PER CITY OF FERNDALE STANDARDS. CONNECT AT MAIN (SEE NOTE 2).
24. = NEW POTABLE REDUCED PRESSURE BACKFLOW PREVENTER ASSEMBLY WITH ALUMINUM INSULATED ENCLOSURE PER DETAIL (2/C4.3)
25. = EXISTING POWER TO CONTAINER. PROTECT DURING CONSTRUCTION.
26. = NEW CONCRETE PAD FOR PROPANE TANK PER DETAIL (3/S1.1)
27. = REMOVE WEEDS AND BRUSH FROM HATCHED AREA AND INSTALL 4" THICK MULCH.
28. = PROTECT TREE AND ORNAMENTAL SHRUBS INDICATED.
29. = PLANT SMALL SHRUBS AS DIRECTED BY CITY OF FERNDALE. FOR BIDDING PURPOSES ASSUME INSTALLATION OF 8 EA, 2-GALLON EVERGREEN SHRUBS.
30. = SCHEMATIC LOCATION OF NEW UNDERGROUND PROPANE LINE FROM TANK TO GENERATOR. PIPE SIZE TO BE DETERMINED BY GENERATOR MANUFACTURER.

NOTES:

1. ALL UNDERGROUND UTILITY PIPING TO BE INSTALLED IN ACCORDANCE WITH DETAIL (2/C4.1)
2. PRIOR TO COMMENCING ANY UNDERGROUND WORK, THE CONTRACTOR SHALL POTHOLE ALL UTILITIES AT ALL PROPOSED CROSSING AND CONNECTION POINTS TO CONFIRM THEIR DEPTH AND PLAN LOCATIONS.
3. HYDROSEED DISTURBED AREAS AROUND STATION AND PAVING.
4. REFERENCE SPECIFICATION SECTION 01010 FOR CONTRACT REQUIREMENTS REGARDING CONTROL OF WASTEWATER DURING DRAIN DOWN AND TIE-IN OF THE NEW FORCE MAIN.

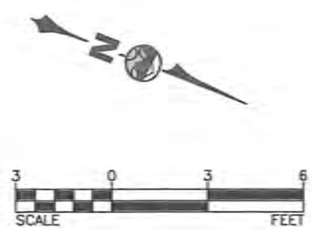
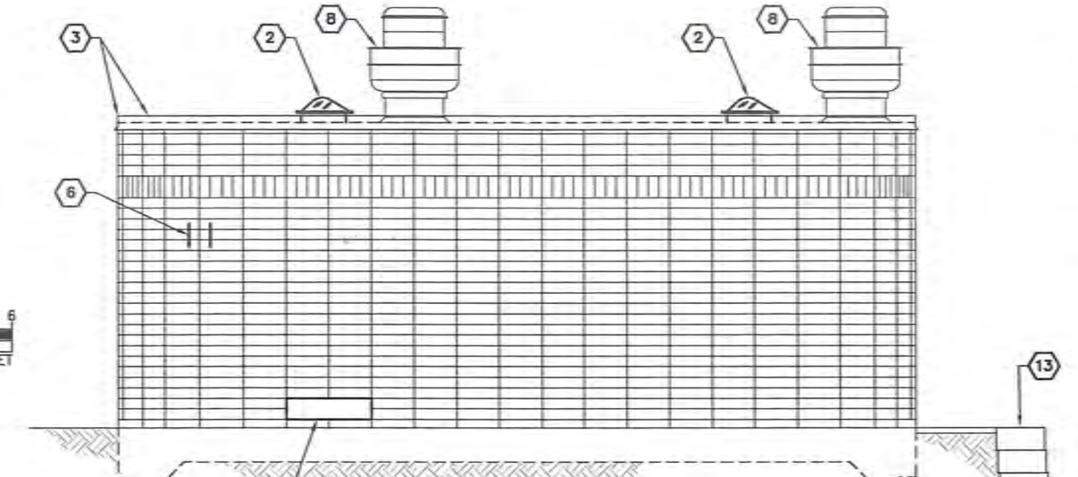
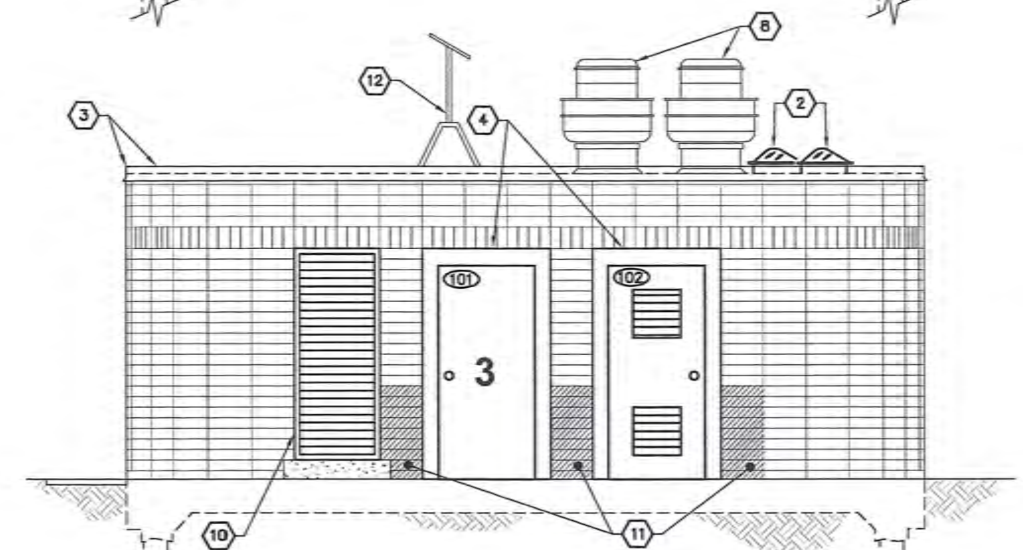
ROOF PLAN

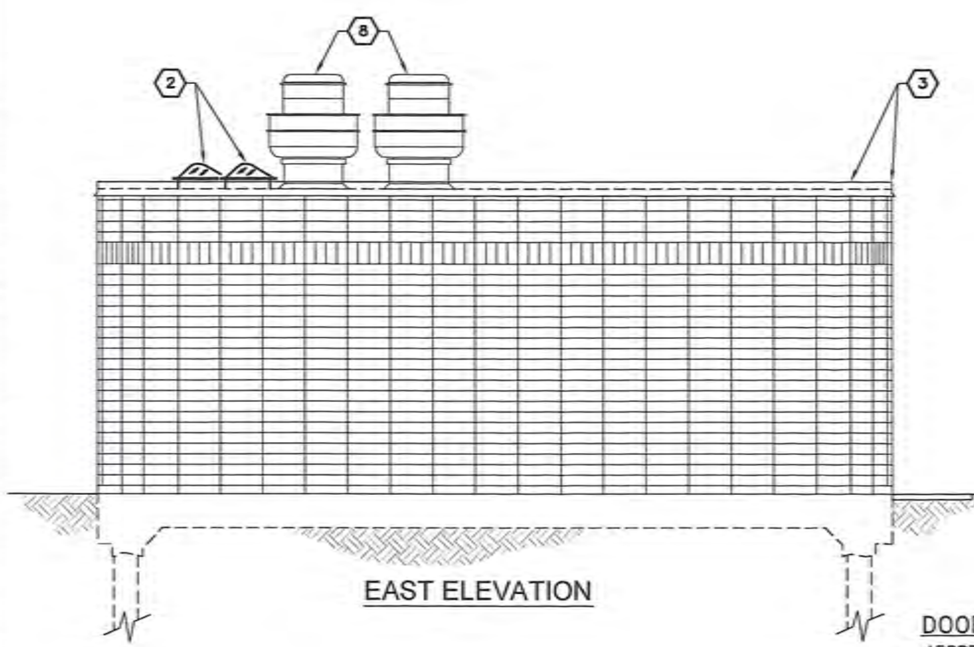




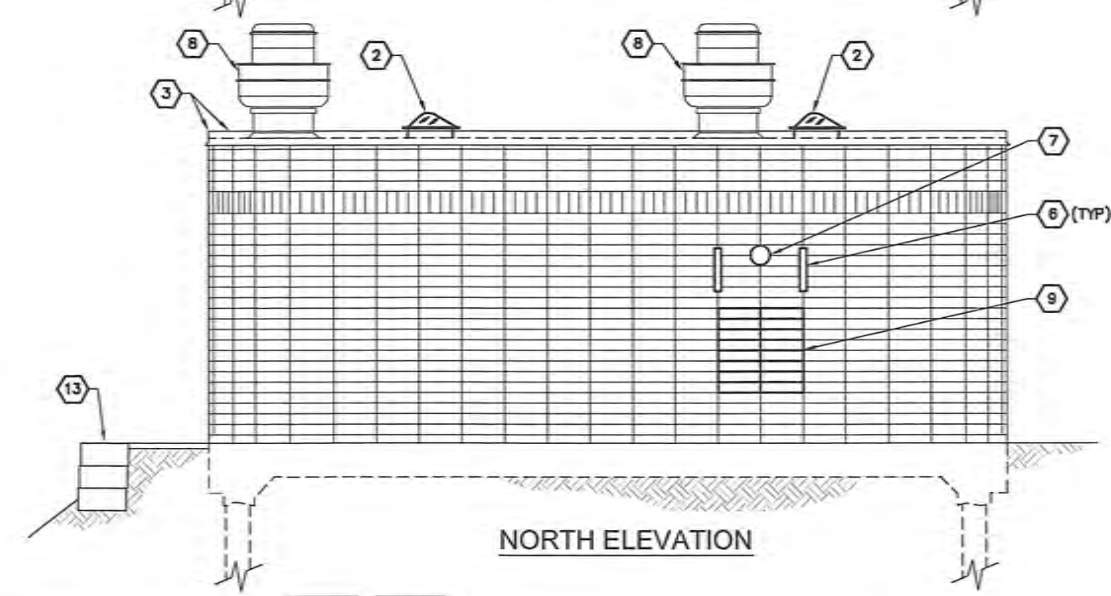
SOUTH ELEVATION



WEST ELEVATION



EAST ELEVATION



NORTH ELEVATION

KEYED NOTES

(1) = REPLACE EXISTING ROOF DRAIN PER DETAIL 4/C4.1. TIE INTO EXISTING ROOF DRAIN PIPING.

(2) = INSTALL NEW SKYLIGHT PER DETAIL 3/C4.1

(3) = REMOVE EXISTING MEMBRANE ROOF AND FASCIA AND PREPARE CONCRETE ROOF FOR NEW MEMBRANE SYSTEM. INSTALL NEW PERIMETER EXTRUDED ALUMINUM FASCIA AND FLASHING AROUND ALL NEW ROOF EQUIPMENT. INSTALL NEW ROOF MEMBRANE SYSTEM.

(4) = INSTALL NEW DOORS #101 & 102. REFERENCE DOOR SCHEDULE FOR DETAILS. ROUGH OPENING FOR EACH DOOR IS APPROXIMATELY 4'–0" X 7'–4". CONTRACTOR TO CONFIRM IN THE FIELD.

(5) = REPLACE EXISTING FIXED LOUVER IN KIND. ROUGH OPENING APPROXIMATELY 2'–8" x 8".

(6) = REMOVE EXISTING UNUSED STEEL SUPPORTS, ANGLES, AND BRACKETS. PATCH ALL HOLES WITH NON–SHRINK GROUT. TYPICAL AROUND THE WHOLE EXTERIOR OF THE BUILDING.

(7) = PLUG EXISTING EXHAUST PIPE OPENING WITH NON–SHRINK GROUT.

(8) = INSTALL NEW ROOFTOP BLOWERS PER DETAIL 2/C4.4

(9) = REPAIR EXISTING 2'–8"x 2'–8" OPENING WITH NEW BRICK

(10) = REPLACE EXISTING LOUVER PER DETAIL 4/C4.3

(11) = REMOVE AND REPLACE CRACKED BRICK (HATCHED) PER DETAIL 1/C4.4

(12) = REMOVE AND REINSTALL EXISTING ANTENNA & MOUNTING AS REQUIRED FOR INSTALLATION OF THE NEW ROOF. (FOR CLARITY, THE ANTENNA IS ONLY SHOWN ON THE WEST ELEVATION.) COORDINATE WITH INSTALLATION OF NEW ROOF.

(13) = GRAVEL PATH AND RETAINING WALL PER DETAIL 5/C4.1

VERTICAL BEND

NOTES

1. SQUARE FEET OF CONCRETE THRUST BLOCK AREA IS BASED ON 200 P.S.I. INTERNAL PRESSURE, A SOIL SAFE BEARING OF 3000 POUNDS PER SQUARE FOOT AND A FACTOR OF SAFETY OF 1.5.
2. BEARING AREA MUST BE ADJUSTED FOR INTERNAL PRESSURES AND LOWER SOIL BEARING VALUES.
3. CONCRETE BLOCKING SHALL BE CAST IN PLACE AND HAVE A MINIMUM OF 1/4 SQUARE FOOT BEARING AGAINST THE FITTING.
4. BLOCK SHALL BEAR AGAINST FITTINGS ONLY AND SHALL BE CLEAR OF JOINTS TO PERMIT TAKING UP OR DISMANTLING JOINT.
5. THE CONTRACTOR SHALL INSTALL BLOCKING WHICH IS ADEQUATE TO WITHSTAND FULL TEST PRESSURE AS WELL AS TO CONTINUOUSLY WITHSTAND OPERATING PRESSURE UNDER ALL CONDITIONS OF SERVICE.
6. STAINLESS STEEL BANDING SHALL BE USED AT 2" PVC VERTICAL BENDS INSTEAD OF 1" RODS. CONTACT ENGINEER FOR SIZING OF THRUST BLOCK AND DETAILS.
7. ALL BENDS, TEES & CROSSES SHALL INCLUDE RESTRAINED JOINTS (ROMAC GRIPPER) AS WELL AS THRUST BLOCKING.

PUMP STATION NO. 3 STRUCTURAL DETAILS

DATE 6/08/2016 | SCALE AS SHOWN | JOB NUMBER 2014-079B

SHEET S1.1 OF 35

STRUCTURAL NOTES

BUILDING CODE CRITERIA

1. All construction is to comply with the 2012 International Building Code (IBC).
2. Loads:
   Catalog load allowance for generator and propane tank.
   100 psf uniform live load for cantilever platforms.
   Wind loads are negligible. Earthquake parameters are as follows:
   SS = 0.95 S1 = 0.32, Soil "E," I_e = 1.5
3. Special Inspections
   No special inspections are required. Concrete work is fully supported on grade, and the design concrete strength of 3500 psi is for reasons of durability.
4. Structural Observation
   The Structural Engineer of record will perform Structural Observations as defined in IBC Section 1702, as required. Note that Structural Observation does not constitute Special Inspection.

01000 GENERAL

1. Employ good standards of workmanship throughout. Provide all materials and perform all construction as indicated. Secure the prior written approval of the Engineer of Record (aka EOR, who is the Engineer whose name is on these drawings) for substitutions.
2. In case of conflict between these notes and the drawings, the more stringent will govern.
3. Verify all dimensions in the field.
4. These drawings and the designs herein are copyrighted by Wilson Engineering, and are for use on this project only.
5. **Do not scale drawings.**
6. The structure as shown on these drawings is designed to be stable and to resist the indicated loads in the completed condition. The drawings do not indicate the method or sequence of construction. The contractor is solely responsible for temporary bracing and shoring, and for safety programs, methods, and procedures of operation for the construction of the design.

01340 SHOP DRAWINGS AND SUBMITTALS

1. Shop drawings shall be submitted before fabrication is started. Allow two weeks for review by the EOR.
2. Shop drawings and submittals shall be clear and legible. Each submittal shall include:
   A. Name of project, fabricator's name, General Contractor, date, and unique drawing title and/or number including revision number.
   B. A blank of 4" x 4" space for Structural Engineer's review stamp.
3. Resubmittals shall be clearly identified as revisions, and all changes clearly marked. The EOR will not be responsible to find unmarked changes.

02220 FOUNDATIONS

1. Spread footings are designed for a maximum total bearing pressure of 1000 psf maximum.
2. Remove all topsoil and organic material from the area below the foundation, and use engineered fill if necessary to provide firm bearing.
3. Place concrete for footings against firm bearing soil. No geotechnical investigation has been performed for this project. Soils are assumed to be sandy-silt or silty-sands. Confirm soils types upon completion of excavation to footing elevation, and notify the engineer if any areas differ from this assumption.

03300 REINFORCED CONCRETE AND ACCESSORIES

1. Reinforcing bars shall be ASTM A615, Grade 60. Do not weld rebar.
2. Bar detailing not shown otherwise, and support of reinforcing bars in forms, shall conform to the Concrete Reinforcing Steel Institute (CRSI) Manual of Standard Practice.
3. Provide 3" minimum cover from face of bars to face of concrete.
4. All concrete shall be ready-mix. Comply with requirements of ASTM C 94 and as follows
   Aggregate Per: ASTM C33 Cement Shall be: Type I or II per ASTM C150
   Admixtures for air entrainment and water reduction shall be per ASTM C260 & ASTM C494 Type A, respectively.
5. Properties including 28-day strengths shall be as follows:

Application	f'c (psi)	w/c (max)	aggregate (max)	Air %
A. Foundation	3500	0.50	1"	6.0

6. Hold all bolts, anchors, dowels, reinforcing bars and metal inserts firmly and accurately in place before concrete is poured; do not insert ("stab") after pouring concrete.
7. Post-installed adhesive anchors bolts shall be of steel conforming to the requirements of the applicable ICC-ES report for the adhesive system. Make and clean holes with equipment per the ICC-ES report. See the drawings for embedment, or use 5" minimum.
   Accepted adhesive products include:
   A. ITW-Ramset Company: Epcon G5 System
   B. Hilti Inc: RE-500 SD System
   C. Simpson Strong-Tie Company: SET-XP Epoxy
   D. Other systems with written approval of the Engineer of Record
   For any product to be accepted, it shall have a currently valid ICC-ES report with test results indicating that it is suitable for use in cracked concrete. Use in accordance with manufacturer's recommendations, including ambient temperature and moisture conditions at time of use.

05120 STRUCTURAL STEEL

1. Materials (except as noted in drawings):
   All materials shall be new stock, unless noted otherwise.
   Channel Shapes: ASTM A36
   Plates and bars: ASTM A36 (A529, A572, A588 optional)
   Steel Pipe: ASTM A53, Grade B
   Bolts, Regular: ASTM A307
   Galvanizing: Shapes and weldments ASTM A123
   Bolts and hardware ASTM A153
2. Minimum welds:
   Welds not specified shall be 3/16" continuous fillet welds, or minimum size per AISC, whichever is greater. All weld sizes are effective sizes; increase as required if gaps exist at meeting surfaces.
3. Welding shall be by WABO Certified welders and shall be as detailed or as specified by American Welding Society Standards D1.1.
4. Field welding is not permitted.
5. All steel shall be hot dip galvanized after fabrication.
6. Checkerplate shall conform to ASTM A786 with a raised diamond pattern and a durable factory applied non-skid finish. Connect to framing with TEKS screws @ 8" O.C., OR powder actuated fasteners @ 8" O.C., diameter, length and powder charge per PAF manufacturer.

PROJECT GENERAL NOTES:

1. THE ELECTRICAL DRAWINGS AND SCHEDULES ARE FUNCTIONAL IN NATURE AND DO NOT SPECIFY EXACT LOCATIONS OF EQUIPMENT OR EQUIPMENT TERMINATIONS. IT IS THE INTENT OF THESE DRAWINGS TO DESCRIBE AND PROVIDE FOR THE FURNISHING, INSTALLING, TESTING AND PLACING IN FULLY OPERATIONAL CONDITION ALL EQUIPMENT, MATERIALS, DEVICES AND NECESSARY APPURTENANCES TO PROVIDE A COMPLETE ELECTRICAL SYSTEM, TOGETHER WITH SUCH OTHER MISCELLANEOUS INSTALLATIONS AND EQUIPMENT SHOWN ON THE DRAWINGS. THE WORK SHALL INCLUDE ALL MATERIALS, APPLIANCES AND APPARATUS NOT SPECIFICALLY MENTIONED HEREIN OR SHOWN ON THE DRAWINGS, BUT WHICH ARE NECESSARY TO MAKE A COMPLETE, FULLY OPERATIONAL INSTALLATION OF ALL ELECTRICAL SYSTEMS SHOWN ON THE DRAWINGS.
2. THIS PROJECT INCLUDES THE INSTALLATION OF PACKAGED EQUIPMENT SYSTEM(S) OR SUB-SYSTEM(S) THAT WILL REQUIRE COORDINATION BETWEEN THE CONTRACTOR AND THE MANUFACTURER TO DETERMINE THE DETAILED INSTALLATION REQUIREMENTS. THE ENGINEER HAS SHOWN GENERAL INSTALLATION INFORMATION FOR THESE SYSTEMS BASED ON THE BEST INFORMATION AVAILABLE AT THE TIME OF DESIGN. WHERE INDICATED ON THE DRAWINGS TO 'PROVIDE A COMPLETE AND OPERATIONAL SYSTEM' THE CONTRACTOR SHALL PROVIDE ALL MATERIALS, INSTALLATION, AND COORDINATION WITH THE MANUFACTURER REQUIRED SO THE EQUIPMENT IS INSTALLED AND OPERATES IN A SATISFACTORY MANNER. MINOR CHANGES IN EQUIPMENT LOCATIONS (LESS THAN 20 FEET), QUANTITY OF TERMINATIONS OR WIRES, JUNCTION BOXES, CONDUIT, ETC SHALL BE INCLUDED IN THE CONTRACT PRICE.
3. CONTRACTOR SHALL COORDINATE WITH OWNER AND UTILITY FOR REMOVAL OF EXISTING EQUIPMENT AND ANY REQUIRED PHASING TO MAINTAIN ALL REQUIRED POWER AND CONNECTIONS .
4. DISPOSE OF ALL DEMO MATERIALS NOT WANTED BY OWNER.
5. COORDINATE WITH OWNER FOR DETAILED EQUIPMENT CONNECTION REQUIREMENTS. GENERAL POWER DISTRIBUTION AND CIRCUIT DESIGNATIONS ARE SHOWN ON THE DRAWINGS.
6. ALL CONDUIT IN NEW WALLS OR CEILINGS SHALL BE CONCEALED WHERE POSSIBLE.
7. ALL ELECTRICAL SERVICE REQUIREMENTS FOR NEW UTILITY SERVICE, TRANSFORMER, METERING, TRENCHING, ETC SHALL BE COORDINATED AND INSTALLED IN STRICT ACCORDANCE WITH OKANOGAN COUNTY PUD REQUIREMENTS. ALL UTILITY INFORMATION MUST BE VERIFIED PRIOR TO BID.
8. THE NUMBER OF CONDUCTORS AND CONDUIT ROUTING WILL VARY BASED ON HOW THE CONTRACTOR ELECTS TO ROUTE AND COMBINE CIRCUITING. THE CONTRACTOR SHALL PROVIDE DETAILED REDLINE MARKUPS ON A DEDICATED SET OF CONSTRUCTION DRAWINGS TO THE ENGINEER UPON COMPLETION OF THE PROJECT FOR PREPARATION OF RECORD DRAWINGS. THIS INCLUDES ACTUAL RACEWAY ROUTING, CONDUCTOR QUANTITIES, PANEL SCHEDULES, RECEPTACLE CONFIGURATIONS AND MOUNTING ELEVATIONS, ETC.
9. ALL MATERIALS SHALL CONFORM TO THE NATIONAL ELECTRICAL CODE ARTICLE 110-14C. WIRING AND CIRCUIT BREAKERS ON THIS PROJECT ARE DESIGNED FOR 75 DEG C OPERATION ABOVE 100 AMPERES; 60 DEG C FOR 100 AMPERES AND BELOW. ALL PRODUCTS FURNISHED ON THIS PROJECT SHALL HAVE ELECTRICAL TERMINATIONS RATED FOR 60 DEG C FOR AMPACITIES OF 100 AMPERES AND BELOW, AND RATED FOR 75 DEG C FOR AMPACITIES ABOVE 100 AMPERES. ALL CONDUCTORS SHALL BE COPPER.

ELECTRICAL SITE PLAN

SCALE: 1" = 5'

5 0 5 10
SCALE HORIZONTAL SCALE FEET

GENERAL NOTES:

1. ALL CONDUIT ROUTING IS NOT SHOWN. ELECTRICAL CONTRACTOR SHALL DETERMINE THE BEST ROUTING PATH AND CIRCUIT COMBINATIONS BASED ON FIELD CONDITIONS AND ELECTRICAL CODES.
2. CONDUCTOR AND CONDUIT SIZING SHALL BE AS REQUIRED BY NEC.
3. EQUIPMENT LOCATIONS AND ARRANGEMENT ARE SCHEMATIC. CONTRACTOR SHALL COORDINATE WITH EQUIPMENT MANUFACTURER FOR DETAILED CONNECTION REQUIREMENTS AND PROVIDE MATERIALS AND INSTALLATION FOR A COMPLETE AND OPERATIONAL SYSTEM.

KEY NOTES:

1. CONTRACTOR SHALL PROVIDE RECEPTACLE(S) IN GENERATOR ENCLOSURE FOR BATTERY CHARGER AND HEATER. PROVIDE BRANCH CIRCUITS TO NEW LIGHTING PANEL LP1; SEE PANEL SCHEDULE.
2. GENERATOR ENCLOSURE TO INCLUDE LIMIT SWITCHES ON ALL EXTERIOR GENERATOR DOORS. WIRE LIMIT SWITCHES IN SERIES TO PROVIDE INTRUSION STATUS TO THE TELEMETRY PANEL.
3. CONTRACTOR SHALL COORDINATE NEW NATURAL GAS CONNECTION AND LP FUEL SUPPLY TO GENERATOR. PROVIDE ALL MATERIALS AND INSTALLATION FOR A REDUNDANT FUEL SYSTEM.
4. NEW AREA LIGHT WITH GFCI RECEPTACLE LOCATED AT THE BASE OF POLE.
5. HAZARDOUS LOCATIONS - FLOW METER VAULT IS CLASS I, DIV 2 PER NFPA 820, TABLE 4.2, ROW 31a. ALL INSTRUMENTATION, ELECTRICAL EQUIPMENT AND INSTALLATION SHALL BE IN ACCORDANCE WITH NEC ARTICLE 500.
6. DEMO EXISTING UTILITY SERVICE EQUIPMENT AND REPLACE WITH NEW 200 AMP SERVICE DISCONNECT AND METER BASE TO MEET CURRENT PSE REQUIREMENTS. EXTEND CONDUIT TO NEW METER BASE. CONDUCTORS FROM POLE TO METER BASE BY PSE. COORDINATE WITH PUGET SOUND ENERGY FOR ADDITIONAL REQUIREMENTS.
7. MAINTAIN EXISTING 120V BRANCH CIRCUIT TO STORAGE CONTAINER. EXTEND RACEWAY AND CONDUCTORS TO NEW LIGHTING PANEL IN MCC.

SHEET E4 OF 35

DEMOLITION WORK:

1. ALL DEMOLITION WORK REQUIRED UNDER THIS CONTRACT IS NOT SHOWN ON THE DRAWINGS.
2. THE CONTRACTOR SHALL INSPECT THE EXISTING SITES AND INSTALLATIONS PRIOR TO BIDDING AND SHALL MAKE HIS OWN JUDGMENT AS TO THE WORK REQUIRED TO PROVIDE COMPLETE DEMOLITION AS SHOWN OR WITHIN THE INTENT OF THE CONTRACT DOCUMENTS.
3. EXISTING EQUIPMENT, SYSTEMS, AND MATERIALS REMOVED DURING DEMOLITION SHALL BE MADE AVAILABLE FOR THIS INSPECTION AND DECISION AS TO WHETHER THE OWNER WILL RETAIN POSSESSION. ITEMS SELECTED FOR RETENTION SHALL BE TURNED OVER TO THE OWNER. THESE ITEMS SHALL BE DELIVERED TO A LOCATION ON THE PREMISES SELECTED BY THE OWNER. ALL MATERIAL NOT SELECTED FOR RETENTION BY THE OWNER AND DEBRIS SHALL BE LEGALLY DISPOSED OF BY THE CONTRACTOR.
4. SEE CIVIL AND ARCHITECTURAL DRAWINGS AND SPECIFICATIONS FOR ADDITIONAL DEMOLITION AND PHASING REQUIREMENTS.

DEMOLITION NOTES:

D1 PROVIDE COMPLETE ELECTRICAL DEMOLITION OF EXISTING MOTOR CONTROL CENTER INCLUDING SERVICE DISCONNECT, AUTOMATIC TRANSFER SWITCH, TRANSFORMER, PANELBOARD, MOTOR STARTERS, AND CIRCUIT BREAKER FOR THE 100A POWER FEED TO PUMP STATION NO.8.

D2 PROVIDE COMPLETE ELECTRICAL DEMOLITION OF EXISTING 150KW GENERATOR INCLUDING NATURAL GAS FUEL SUPPLY, WALL MOUNTED AIR-INTAKE LOUVER, EXHAUST FAN, AND EXTERIOR MUFFLER SYSTEM.

D3 REPLACE EXISTING UTILITY SERVICE EQUIPMENT. COORDINATE EQUIPMENT REQUIREMENTS WITH PUGET SOUND ENERGY.

D4 PROVIDE COMPLETE ELECTRICAL DEMOLITION OF TWO (2) EXISTING 15HP PUMPS.

D5 DEMO ALL EXISTING INTERIOR AND EXTERIOR LIGHT FIXTURES.

D6 PROVIDE COMPLETE ELECTRICAL DEMOLITION OF TWO (2) EXISTING EXHAUST FANS.

D7 PROVIDE COMPLETE DEMOLITION OF EXISTING PHONE SERVICE. PATCH AND SEAL INTERIOR / EXTERIOR WALL AS REQUIRED.

D8 REMOVE EXISTING TELEMETRY EQUIPMENT LOCATED ON ROOF. PROTECT AND REINSTALL AFTER ROOF RENOVATION.

KEY NOTES:

1. CONTRACTOR SHALL PROVIDE NEW MOTOR CONTROL CENTER AND ALL REQUIRED RACEWAY TO CONNECT ALL EQUIPMENT SHOWN ON DRAWINGS.
2. EXHAUST FAN MOTOR AND DISCONNECT LOCATED ON ROOF OF BUILDING, PROVIDE RACEWAY TO VFD LOCATED IN NEW ELECTRICAL MCC.
3. HAZARDOUS LOCATIONS - CLASS I, DIV 1 PER NFPA 820. ALL INSTRUMENTATION, ELECTRICAL EQUIPMENT AND INSTALLATION SHALL BE IN ACCORDANCE WITH NEC ARTICLE 500.
4. CONTRACTOR SHALL PROVIDE NEW ALLEN BRADLEY PANELVIEW OPERATOR INTERFACE, I/O CARD, NETWORK SWITCH AND INSTALLATION; SEE CONTROL DRAWINGS.
5. CONNECT NEW AND EXISTING ELECTRICAL EQUIPMENT TO NEW PANEL LP1 LOCATED IN MCC. PROVIDE NEW RACEWAY AS REQUIRED.
6. PROVIDE NEW NEMA 12 FLOAT CONTROL PANEL; SEE DRAWING E8.
7. PROVIDE NEW UTILITY SERVICE EQUIPMENT. COORDINATE EQUIPMENT REQUIREMENTS WITH PUGET SOUND ENERGY.
8. PROVIDE VANDAL PROOF RED LED HIGH LEVEL ALARM LIGHT. WIRE TO TELEMETRY PANEL TO INDICATE HIGH LEVEL ALARM.
9. REPLACE EXISTING WET WELL LEVEL TRANSMITTER, LEVEL FLOATS AND OPERATOR IN TROUBLE PUSH BUTTONS. REPLACE EXISTING PUMP ROOM FLOOD SWITCH AND OPERATOR IN TROUBLE PUSH BUTTON.
10. RELOCATED TELEMETRY PANEL. RECONNECT ALL EXISTING EQUIPMENT AND SIGNALS. CONNECT ALL NEW EQUIPMENT AND SIGNALS AS REQUIRED.
11. PROVIDE ELECTRICAL DISCONNECT FOR AIR GAP WATER SYSTEM.

GENERAL LIGHTING NOTES:

1. DEMO ALL EXISTING LIGHTING AND REPLACE WITH NEW FIXTURES PER LIGHTING SCHEDULE. COORDINATE ALL FINAL FIXTURE LOCATIONS WITH MECHANICAL TO AVOID CONFLICTS.
2. LIGHTING CIRCUITS SHALL BE #12 AWG COPPER. ROUTING SHOWN ON PLANS IS SCHEMATIC. ROUTE ALL LIGHTING CIRCUITS TO LIGHTING PANEL, SEE SCHEDULES. ELECTRICAL CONTRACTOR SHALL DETERMINE THE BEST ROUTING PATH AND CIRCUIT COMBINATIONS BASED ON FIELD CONDITIONS AND ELECTRICAL CODES.
3. PROVIDE UNSWITCHED POWER CIRCUIT TO ALL EMERGENCY FIXTURES. CONTRACTOR MAY USE EXISTING RECESSED JBOXES AND RACEWAY WHERE IN SUITABLE CONDITION. REPLACE WHERE NECESSARY. PROVIDE STAINLESS STEEL COVER ON ALL SPARE RECESSED JBOXES.

KEY NOTES:

1. PROVIDE LIGHT FIXTURE WITH EMERGENCY BATTERY PACK WHERE INDICATED.
2. HAZARDOUS LOCATIONS - CLASS I, DIV 1 PER NFPA 820. ALL INSTRUMENTATION, ELECTRICAL EQUIPMENT AND INSTALLATION SHALL BE IN ACCORDANCE WITH NEC ARTICLE 500.

NOTES:
1. FEEDER ID FOLLOWED BY THE SUFFIX "N" INDICATES NEUTRAL CONDUCTOR. PROVIDE ADDITIONAL NEUTRAL CONDUCTOR SIZED TO MATCH PHASE CONDUCTORS.
2. CONDUCTOR AMPACITY BASED ON NEC TABLE 310.16.
3. CONDUIT FILL BASED ON NEC ANNEX C, TABLE C.1 FOR THHN TYPE CONDUCTORS. CONTRACTOR SHALL PROVIDE ADJUSTMENTS AS NECESSARY FOR OTHER CONDUCTOR TYPES.
4. CONTRACTOR MAY COMBINE BRANCH CIRCUITS IN COMMON RACEWAY UP TO SIX CURRENT CARRYING CONDUCTORS. ADJUSTMENT FACTORS SHALL BE APPLIED PER NEC TABLE 310.15(B)(2)(a).
5. MINIMUM CONDUIT SIZE FOR UNDERGROUND RACEWAY IS 1 INCH.

SECONDARY AND FEEDER RACEWAY
SCALE: NONE

GENERAL NOTES:

1. MAINTAIN 12" MIN. SEPARATION BETWEEN WATER UTILITIES.
2. PROVIDE 2" SEPARATION BETWEEN MULTIPLE CONDUITS AND NEAREST SIDEWALL.
3. TRENCH WIDTH TO ACCOMMODATE ALL CONDUITS AND SERVICES. MINIMUM WIDTH 18".
4. BACKFILL IN ACCORDANCE WITH UTILITY AND CIVIL STANDARDS.
5. CONDUIT SHALL BE BEDDED W/SAND (3" BASE & 3" COVER MIN).
