Are you planning a fundraising car wash?

Water that runs into storm drains goes directly into our lakes, streams, and Puget Sound with little or no treatment. Runoff from car washes is toxic to fish and other aquatic life.

Use a stormwater-friendly car wash kit*

The City of Ferndale loans out easy to use car wash kits for free. These kits use a storm drain insert and a pump to send the dirty (process) water to a vegetated area to soak into the ground.

For more information about how you can borrow a stormwater-friendly car wash kit for your next fundraiser, call (360) 685-2357 or email stormwater@cityofferndale.org

*Discharging process water into the City stormwater system is considered an Illicit Discharge per [FMC 13.34](#)
